WE ARE NOT SOLICITING PROXIES.

Item 2. Rights of Shareholders; Dissenters' Right of Appraisal

The Corporation recognizes the right of all shareholders to be treated fairly and equally whether they are controlling, minority, local or foreign. The Corporation respects the rights of shareholders as provided under the Revised Corporation Code and other laws, and as stated in its Articles of Incorporation and By-Laws.

Any stockholder of the Corporation may exercise his appraisal right against the proposed actions which qualify as instances giving rise to the exercise of such right pursuant to and subject to the compliance with the requirements and procedure set forth under Title X of the Revised Corporation Code of the Philippines.

There are no matters to be acted upon by the stockholders at the Annual Meeting of the Stockholders to be held on May 11, 2022 which would require the exercise of the appraisal right.

Item 3. Interest of Certain Persons in or Opposition to Matters to be Acted Upon

None of the following persons have any substantial interest, direct or indirect, in any matter to be acted upon other than election to office:

1. Directors or officers of the Corporation at any time since the beginning of the last fiscal year;
2. Nominees for election as directors of the Corporation;
3. Associate of any of the foregoing persons.

B. CONTROL AND COMPENSATION INFORMATION

Item 4. Voting Securities and Principal Holders Thereof

(a) Voting Securities Entitled to be Voted at the Meeting

The Corporation has 2,190,477,678 outstanding shares as of March 31, 2022. Every stockholder shall be entitled to one vote for each share of stock held as of the established record date.

(b) Record Date

All stockholders of record as of April 4, 2022 are entitled to notice and to vote at the Corporation's Annual Meeting of Stockholders.

Section 10, Article II of the Amended By-Laws of the Corporation states that, for purposes of determining the stockholders entitled to notice of, or to vote or be voted at any meeting of stockholders or any adjournments thereof, or entitled to receive payment of any dividends or other distribution or allotment of any rights, or for the purpose of any other lawful action, or for making any other proper determination of stockholders, the Board of Directors may provide that the stock and transfer books be closed for a stated period, which shall not be more than sixty (60) days nor less than thirty (30) days before the date of such meeting. In lieu of closing the stock and transfer books, the Board of Directors may fix in advance a date as the record date for any such determination of stockholders. A determination of stockholders of record entitled to notice of or to vote or be voted at a meeting of stockholders shall apply to any adjournment of the meeting; *provided, however*, that the Board of Directors may fix a new record date for the adjourned meeting.

(c) Election of Directors

The directors of the Corporation shall be elected by plurality vote at the annual meeting of the stockholders for that year at which a quorum is present. At each election for directors every stockholder shall have the right to vote, in person or by proxy, or via remote communication or *in absentia*, electronically or otherwise, as may be provided for by the Board of Directors, the number of shares owned by him for as many persons as there are directors to be elected, or to cumulate his votes by giving one candidate as many votes as the number of such directors multiplied by the number of his shares shall equal, or by distributing such votes as the same principle among any number of candidates.

The report attached to this SEC Form 20-IS is the management report to stockholders required under SRC Rule 20 to accompany the SEC Form 20-IS and is hereinafter referred to as the "Management Report".

(d) Security Ownership of Certain Record and Beneficial Owners and Management

8. Consideration of such other matters as may properly come during the meeting.
9. Adjournment.

The Annual Meeting of the Stockholders was held on May 13, 2021 by remote communication and was attended by shareholders, the Board of Directors, and by various officers of the Corporation. The shareholders were allowed to cast their votes by proxy or *in absentia* on each agenda item presented to them for approval, with the number of votes approving each agenda item presented at the meeting and indicated in their respective sections in the Minutes. The shareholders were also given the opportunity to send in their questions, express opinions, and make suggestions on various issues related to the Corporation by electronic mail. The Corporation received questions and provided responses which are indicated in the section on “Consideration of Other Matters” in the Minutes. The Minutes of the Annual Meeting of the Stockholders held on May 13, 2021 may be viewed and/or downloaded at <https://bit.ly/URC2021ASMMMinutes>.

Brief description of material matters approved by the Board of Directors and Management and disclosed to the SEC and PSE since the last Annual Meeting of Stockholders on May 13, 2021 for ratification by the stockholders:

1. Approval of the Buy-back of common shares of Universal Robina Corporation
2. Appointment of the Chairmen and members of the Board Committees
3. Appointment of officers
4. Resetting of the Annual Meeting of the Stockholders
5. Setting of April 4, 2022 as the record date for the Annual Meeting.
6. Declaration of regular and special cash dividends

Item 16 – 18. None.

Item 19. Voting Procedures

(a) The vote required for approval or election

Pursuant to Article II, Section 6 of the Amended By-Laws of the Corporation, a majority of the subscribed and outstanding capital, present in person, represented by proxy, or participating in the meeting via remote communication, shall be sufficient at a stockholders' meeting to constitute a quorum for the election of directors and for the transaction of any business whatsoever, except in those cases in which the Revised Corporation Code requires the affirmative vote of a greater proportion. Stockholders casting their votes in absentia, as may be provided for by the Board of Directors, shall also be deemed present for purposes of determining the existence of a quorum. Meetings of the stockholders may be conducted via remote communication, such as by teleconferencing or videoconferencing, subject to such guidelines as may be promulgated by the SEC.

The vote of the stockholders representing a majority of a quorum shall be required to approve any action submitted to the stockholders for approval, except in those cases where the Revised Corporation Code requires the affirmative vote of a greater proportion.

Unless otherwise prescribed by the Revised Corporation Code or by special law, and for legitimate purposes, any provision or matter stated in the articles of incorporation may be amended by a majority vote of the board of directors and the vote or written assent of the stockholders representing at least two-thirds (2/3) of the outstanding capital stock, without prejudice to the appraisal right of dissenting stockholders in accordance with the provisions of the Revised Corporation Code.

(b) The method by which votes will be counted

In accordance with Article II, Section 7 of the Amended By-Laws, every stockholder shall be entitled to vote, in person or by proxy, or via remote communication or in absentia, electronically or otherwise, as may be provided for by the Board of Directors, for each share of stock held by him, which has voting power upon the matter in question.

Article II, Section 9 of the Amended By-Laws also provides that stockholders may vote at all meetings the number of shares registered in their respective names, either in person or by proxy, duly given in writing and duly presented to and received by the Secretary for inspection and recording not later than five (5) working days before the time set for the meeting, except such period shall be reduced to one (1) working day for meetings that are adjourned due to lack of the necessary quorum. No proxy bearing a signature which is not legally acknowledged by the Secretary shall be honored at the meetings. Proxies shall be valid and effective for five (5) years, unless the proxy provides for a shorter period, and shall be suspended for any meeting wherein the stockholder appears in person.

Article II, Section 8 of the Amended By-Laws also provides that the directors of the Corporation shall be elected by plurality vote at the annual meeting of the stockholders for the year at which a quorum is present. At each election for directors, every stockholder shall have the right to vote, in person or by proxy, or via remote communication or in absentia, electronically or otherwise, as may be provided for by the Board of Directors, the number of shares owned by him for as many persons as there are directors to be elected, or to cumulate his votes by giving one candidate as many votes as the number of such directors multiplied by the number of his shares shall equal, or by distributing such votes as the same principle among as many number of candidates.

Sections 23 and 57 of the Revised Corporation Code provides that the Corporation may allow a stockholder to cast his vote *in absentia* via modes which the Corporation shall establish, taking into account the Corporation's scale, number of shareholders or members, structure and other factors consistent with the basic right of corporate suffrage.

Pursuant to Article IV, Section 9 of the Amended By-Laws, the Secretary shall record all the votes and proceedings of the stockholders and of the directors in a book kept for that purpose.

Item 20. Participation of Stockholders by Remote Communication

In support of the efforts to contain the outbreak of COVID-19 and to ensure the safety and welfare of its stockholders, directors, officers, and employees, the Corporation will dispense with the physical attendance of stockholders at the meeting and will allow attendance only by remote communication. The livestream of the meeting shall be viewable at the following web address: <https://tinyurl.com/URC2022ASM>.

In order for the Corporation to properly conduct validation procedures, stockholders who have not sent their proxies or voted *in absentia* who wish to participate via remote communication must notify the Corporation by email to corporate.secretary@urc.com.ph on or before May 4, 2022.

Please refer to Annex "E" for the detailed guidelines for participation via remote communication and the procedure for registration and casting votes *in absentia*.

Discussion on compliance with leading practices on corporate governance

The Corporation adheres to the principles and practices of good corporate governance, as embodied in its Corporate Governance Manual, Code of Business Conduct, and related SEC Circulars.

On December 16, 2020, the Board of Directors approved the additional revisions made to the Revised Corporate Governance Manual of the Corporation in accordance with SEC Memorandum Circular No. 19, Series of 2016. The Revised Corporate Governance Manual was filed with the SEC on December 22, 2020. Continuous improvement and monitoring of governance and management policies have been undertaken to ensure that the Corporation observes good governance and management practices. This is to assure the shareholders that the Corporation conducts its business with the highest level of integrity, transparency and accountability.

SEC Memorandum Circular No. 15, Series of 2017 mandates all listed companies to submit an Integrated Annual Corporate Governance Report (“I-ACGR”) on May 30 of the following year for every year that the company remains listed in the PSE.

PSE Memorandum Circular CN No. 2017-0079 provides that the I-ACGR effectively supersedes the SEC’s Annual Corporate Governance Report and the PSE’s Corporate Governance Disclosure Report.

The Corporation likewise consistently strives to raise its financial reporting standards by adopting and implementing prescribed Philippine Financial Reporting Standards.

UNIVERSAL ROBINA CORPORATION, AS REGISTRANT, WILL PROVIDE WITHOUT CHARGE, UPON WRITTEN REQUEST, A COPY OF THE REGISTRANT’S ANNUAL REPORT ON SEC FORM 17-A. SUCH WRITTEN REQUESTS SHOULD BE DIRECTED TO THE OFFICE OF THE CORPORATE SECRETARY, 40/F ROBINSONS EQUITABLE TOWER, ADB AVENUE CORNER POVEDA ST., ORTIGAS CENTER, PASIG CITY, METRO MANILA, PHILIPPINES.

SIGNATURE PAGE

After reasonable inquiry and to the best of my knowledge and belief, I certify that the information set forth in this report is true, complete, and correct. This report is signed in the City of Pasig on April 12, 2022.

**2022 ANNUAL STOCKHOLDERS’ MEETING
OF
UNIVERSAL ROBINA CORPORATION

REGISTRATION AND PROCEDURE FOR
VOTING *IN ABSENTIA*
AND
PARTICIPATION VIA REMOTE COMMUNICATION**

I. VOTING *IN ABSENTIA*

Universal Robina Corporation (the “Corporation”) has established a procedure for the registration of and voting in absentia by stockholders at the annual meeting, as allowed under Sections 23 and 57 of the Revised Corporation Code.

1. Stockholders of record as of April 4, 2022 (the “Stockholder/s”) may register by sending an email to corporate.secretary@urc.com.ph with the following supporting documents:
 - a. For individual Stockholders:
 - i. Government-issued identification (ID) of the Stockholder;
 - ii. For Stockholders with joint accounts: A scanned copy of an authorization letter signed by all Stockholders, identifying who among them is authorized to cast the vote for the account.
 - iii. If holding shares through a broker, the certification from the broker stating the name of the beneficial owner and the number of shares owned by such Stockholder.
 - b. For corporate Stockholders:
 - i. Secretary’s Certificate authorizing the designated representative to vote the shares owned by the corporate Stockholder;
 - ii. Government-issued identification (ID) of the designated representative.
 - iii. If holding shares through a broker, certification from the broker stating the name of the beneficial owner and the number of shares owned by such Stockholder.

Registration shall be open from April 19 to April 26, 2022.

2. Registration shall be validated by the Office of the Corporate Secretary in coordination with the Stock Transfer Agent of the Corporation. Once the Stockholder has been successfully validated, the Stockholder shall be officially registered for the annual meeting and a digital ballot shall be generated for the Stockholder which shall be sent to the email address used by the Stockholder for registration.
3. The registered Stockholder may then proceed to fill out the ballot with the votes. All items in the agenda for approval shall be shown one at a time and the registered Stockholder may vote Yes, No, or Abstain. The vote is considered cast for all the registered Stockholder’s shares.
4. Once voting on all the agenda items is finished, the registered Stockholder is encouraged to review the votes before submitting the ballot. The Stockholder can then proceed to submit the accomplished ballot by clicking the ‘Submit’ button. The Stockholder may choose to have a summary of the votes cast sent to the email address of the registered Stockholder. Once the ballot has been submitted, votes may no longer be changed.

Multiple submissions of the digital ballot under the same shareholder for the same shares shall be invalidated.

5. Voting *in absentia* shall be open from April 27, 2022 to May 4, 2022.
6. The Office of the Corporate Secretary shall tabulate all votes cast *in absentia* together with the votes cast by proxy, and an independent third party will validate the results.
7. Stockholders who register and vote on the website for voting *in absentia* are hereby deemed to have given their consent to the collection, use, storing, disclosure, transfer, sharing and general processing of their personal data by the Corporation and by any other relevant third party for the purpose of electronic voting *in absentia* for the Annual Stockholders' Meeting and for all other purposes for which the Stockholder can cast his/her/its vote as a stockholder of the Corporation.

II. PARTICIPATION VIA REMOTE COMMUNICATION

1. Stockholders may attend the meeting on May 11, 2022 at 1:00 p.m. via the following livestreaming link: <https://tinyurl.com/URC2022ASM>. The livestream shall be broadcast via Microsoft Teams, which may be accessed either on the web browser or on the Microsoft Teams app. Those who wish to view the livestream may sign in using any Microsoft account or may join the stream anonymously.
2. Stockholders who have not sent their proxies or registered on the voting *in absentia* website ("Unregistered Stockholders") may still attend the meeting through the broadcast link. In order to be counted for the determination of quorum, Unregistered Stockholders are requested to notify the Corporation by e-mail to corporate.secretary@urc.com.ph by May 4, 2022 of their intention to participate in the meeting by remote communication.

For validation purposes, the notification email from the Stockholder shall contain the following:

- a. Government-issued identification (ID) of the shareholder
 - b. If holding shares through a broker, certification from the broker stating the name of the beneficial owner and the number of shares owned by such shareholder.
3. For purposes of quorum, only the following Stockholders shall be counted as present:
 - a. Stockholders who have registered and voted in absentia before the cut off date;
 - b. Stockholders who have sent their proxies before the deadline;
 - c. Stockholders who have notified the Corporation of their intention to participate in the meeting by remote communication before the deadline
 4. Questions and comments on the items in the Agenda may be sent to corporate.secretary@urc.com.ph. Questions or comments received on or before May 4, 2022 may be responded to during the meeting. Any questions not answered during the meeting shall be answered via email.

Information required by the SEC Pursuant to SRC Rule 20

PART I – BUSINESS AND GENERAL INFORMATION

Item 1. Business

Universal Robina Corporation (URC or the Company) is one of the largest branded food product companies in the Philippines and has established a strong presence in the ASEAN region. URC has the distinction of being called the country's first "Philippine Multinational". The Company was founded in 1954 when Mr. John Gokongwei, Jr. established Universal Corn Products, Inc., a cornstarch manufacturing plant in Pasig. The Company is involved in a wide range of food-related businesses, including the manufacture and distribution of branded consumer foods, production of hogs and poultry, manufacture of animal feeds and veterinary products, flour milling, and sugar milling and refining. URC has also ventured into renewables business for sustainability through its Distillery and Cogeneration divisions. In the Philippines, URC is a dominant player with leading market shares in Snacks, Candies and Chocolates, and is a significant player in Biscuits. URC is also the largest player in the Ready-to-Drink (RTD) Tea market and Cup Noodles, and is a competitive 3rd player in the Coffee business. With six mills operating as of December 31, 2021, URC Sugar division remains to be the largest producer in the country based on capacity aided by the purchase of Roxas Holdings, Inc.'s sugar mill, ethanol plant and other investment properties in La Carlota City, Negros Occidental. The acquisition also allows for operational synergies between La Carlota and URC's existing operations in Sugar and continue in the efforts to support the development of the sugar industry in the Philippines. The Company's financial condition remained solid in the said period despite the acquisition.

No material reclassifications, merger, consolidation, or purchase or sale of significant amount of assets (not ordinary) were made in the past three years (2019-2021) except those mentioned in the succeeding paragraphs. The Company's financial condition has remained solid in the said period.

The Company operates its food business through operating divisions and wholly-owned or majority-owned subsidiaries that are organized into three business segments: branded consumer foods, agro-industrial products and commodity food products.

Branded consumer foods (BCF) segment, including packaging division, is the Company's largest segment contributing about 71.4% of revenues for the year ended December 31, 2021. Established in the 1960s, the Company's branded consumer foods segment manufactures and distributes a diverse mix of salty snacks, chocolates, candies, biscuits, packaged cakes, beverages and instant noodles. The manufacturing, distribution, sales, and marketing activities of BCF segment are carried out mainly through the Company's branded consumer foods division consisting of snack foods, beverage, and noodles and pasta, although the Company conducts some of its branded consumer foods operations through its majority-owned subsidiaries and joint venture companies. The Company established URC BOPP Packaging and URC Flexible Packaging divisions to engage in the manufacture of bi-axially oriented polypropylene (BOPP) films for packaging companies and flexible packaging materials to cater various URC branded products. Both manufacturing facilities are located in Simlong, Batangas and are ISO 9001:2008 certified for Quality Management Systems.

Majority of URC's consumer foods business are conducted in the Philippines but has expanded more aggressively into other ASEAN markets, primarily through its wholly-owned subsidiary, URC International. In 2021, URC acquired Munchy's, one of the leading players in the Biscuits category in Malaysia, which provides a wide variety of offerings across all key biscuit segments with well-loved brands including Munchy's Cream Crackers, Lexus Cream Sandwich, Oat Krunch, Muzic Wafer and Choc-O Cookies. The international operations contributed about 19.0% of the Company's sale of goods and services for the year ended December 31, 2021.

The Company's agro-industrial products segment operates three divisions: (1) Farms, (2) Animal Nutrition and Health; and (3) Food, Drugs and Disinfectants. This segment contributed approximately 9.8% of sale of goods and services in 2021.

The Company's commodity food products segment operates three divisions: (1) sugar milling and refining through Sugar division, (2) flour milling through Flour division, and (3) renewable energy development through Distillery and Cogeneration divisions. This segment contributed approximately 18.8% of sale of goods and services in 2021.

The Company is a core subsidiary of JG Summit Holdings, Inc. (JGSHI), one of the largest and most diversified conglomerates in the Philippines. JGSHI has substantial business interests in air transportation, property development and hotel management, banking and financial services, and petrochemicals (JG Summit owns the only naphtha cracker complex in the country). It also has non-controlling minority stakes in the country's leading telecommunications, power generation and electricity distribution companies, as well as in a leading Singapore property company.

The percentage contribution to the Company's sale of goods and services from continuing operations for each of the three years ended December 31, 2019, 2020 and 2021, by each of the Company's principal business segments is as follows:

	For the Years Ended December 31		
	2019	2020	2021
Branded Consumer Foods Group	75.7%	73.9%	71.4%
Agro-Industrial and Commodity Foods Group	24.3%	26.1%	28.6%
	100.00%	100.0%	100.0%

The geographic percentage distribution of the Company's sale of goods and services from continuing operations for each of the three years ended December 31, 2019, 2020 and 2021 is as follows:

	For the Years Ended December 31		
	2019	2020	2021
Philippines	79.2%	81.2%	81.0%
International	20.8%	18.8%	19.0%
	100.00%	100.00%	100.00%

Customers

None of the Company's businesses is dependent upon a single customer or a few customers that a loss of anyone of them would have a material adverse effect on the Company. The Company has no single customer that, based upon existing orders, will account for 20.0% or more of the Company's total sale of goods and services.

Distribution, Sales and Marketing

The Company has developed an effective nationwide distribution chain and sales network that it believes provide its competitive advantage. The Company sells its branded food products primarily to supermarkets, as well as directly to top wholesalers, large convenience stores, large scale trading companies and regional distributors, which in turn sell its products to other small retailers and down line markets. The Company's branded consumer food products are distributed directly to approximately 250,000 outlets in the Philippines and sold through various retailers and regional distributors. URC intends to expand its distribution network coverage in the Philippines by increasing the number of retail outlets that its sales force and distributors directly service.

The branded consumer food products are generally sold by the Company from salesmen to wholesalers or supermarkets, and regional distributors to small retail outlets. 15 to 30-day credit terms are extended to wholesalers, supermarkets and regional distributors.

The Company believes that its emphasis on marketing, product innovation and quality, and strong brand equity has played a key role in its success in achieving leading market shares in the different categories where it competes. In particular, URC launched “Jack ‘n Jill” as a master umbrella brand for all its snack food products in order to enhance customer recognition. URC devotes significant expenditures to support advertising and branding to differentiate its products and further expand market share both in the Philippines and in its overseas markets, including funding for advertising campaigns such as television commercials and radio, print and digital advertisements, as well as trade and consumer promotions.

URC Agro-Industrial Group (AIG) constantly provides quality products and services to both Agri trade partners and end consumers alike. Both piggery and poultry farms of URC AIG are GAHP (Good Animal Husbandry Practice) accredited, and 100% compliant to Good Manufacturing Practices (GMP). In addition, the meats and eggs brand, Robina Farms, maintains high quality and safety guarantee with its No Hormone and No Antibiotic residue certification. This has allowed AIG to aggressively capture the quality conscious meat and eggs segment of the country as embodied by the Robina Farms brand with its key positioning of Robina-Raised, Family-Safe products. Similarly, AIG’s Feeds business, championed by Uno+, Supremo Gamefowl, and Top Breed Dog brands have increased its distribution network supported by the Kabalikat Farm Program covering Hog and Gamefowl and Kennel stakeholders.

Competition

The BCF business is highly competitive and competition varies by country and product category. The Company believes that the principal competitive factors include price, taste, quality, convenience, brand recognition and awareness, advertising and marketing, availability of products and ability to get its product widely distributed. Generally, the Company faces competition from both local and multinational companies in all of its markets. In the Philippines, major competitors in the market segments in which it competes include Liwayway Marketing Corporation, Republic Biscuit Corporation, Suncrest Foods Inc., Monde Nissin Corporation, Nestle Philippines, Inc., and Mondelez Philippines, Inc. Internationally, major competitors include Procter & Gamble, Mars Inc., Lotte Group, Perfetti Van Melle Group, PT Mayora Indah Tbk, Tan Hiep Phat Beverage Group, Nestlé S.A., PepsiCo, Inc., and Mondelez International, Inc.

URC AIG has re-oriented its business model under three major business segments: Farms, Animal Nutrition and Health; and Food, Drugs and Disinfectants. This reorientation will allow URC AIG to pivot itself towards capturing the new opportunities brought about by the current changes in the agricultural sector as well as the new normal. The market for AIG is now more diverse, ranging from its original agri-based categories such as feeds to its more consumer-oriented categories such as processed meat under farms, and alcohol under the Drugs and Disinfectants business group. Consistent as before, the market is highly fragmented, competitive, consumer-driven, and principally domestic. The Company is focused and known as a ‘Kabalikat’, sharing best practices with partners and providing total solutions and protection to Filipino consumers nationwide.

The Company’s key competitive factors are brand equity, product quality, affordability, supply availability and reliability. Considering that the three major business segments: Farms, Animal Nutrition and Health; and Food, Drugs and Disinfectants are represented by core products directly and indirectly used by the common household, the said categories are subject to continuous changes particularly customer preferences and lifestyle. Key competitors include San Miguel Corporation, UNAHCO (Unilab Group), Aboitiz Equity Ventures, Inc. (Pilmico), and Bounty Farms.

Enhancement and Development of New Products

The Company intends to continuously introduce innovative new products, product variants and line extensions in the snackfoods (snacks, biscuits, candies, chocolates and bakery), beverage, and grocery (instant noodles) products. This year alone, the Company's Branded Consumer Foods Philippine business has introduced 36 new products, which contributed 2.1% to its total sales.

The Company supports the rapid growth of the business through line expansion, construction and acquisition of plants.

Raw Materials

A wide variety of raw materials are required in the manufacture of the Company's food products, including corn, wheat, flour, sugar, robusta coffee beans, palm oil and cocoa powder. Some of which are purchased domestically and some are imported. The Company also obtains a major portion of its raw materials from its commodity food products segments, such as flour and sugar, and flexible packaging materials from its packaging segment. A portion of flexible packaging material requirements is also purchased both locally and from abroad (Vietnam and Indonesia), while aseptic packaging is purchased entirely from China.

For its Animal Nutrition and Health segment, the Company requires a variety of raw materials, including corn grains, soya beans and meals, feed-wheat grains, wheat bran, wheat pollard, soya seeds, rice bran, copra meal and fish meal. The Company purchases corn locally from corn traders and imports feed wheat from suppliers in North America, Australia, Europe and China. Likewise, soya seeds are imported by the Company from the USA.

For its Drugs and Disinfectants segment, the Company sources its major raw materials locally. The key ingredient in Alcohol is rectified spirit, which is sourced internally from its distillery plants across the country. For its animal health products, the Company requires a variety of antibiotics and vitamins, which it acquires from suppliers in Europe and Asia. The Company maintains approximately two months physical inventory and one month in-transit inventory for its imported raw materials.

For its Farms segment, the Company requires a variety of raw materials, primarily close-herd breeding stocks. For its poultry business, the Company purchases the parent stock for its layer chicks from Dekalb from Europe and Hy-line from the USA. Robina Farms obtains all of the feeds it requires from its Animal Nutrition and Health segment and substantially all of the minerals and antibiotics from its Drugs and Disinfectants segment as part of its vertical integration. The Company purchases vaccines, medications and nutritional products from a variety of suppliers based on the values of their products.

The Company obtains sugar cane from local farmers. Competition for sugar cane supply is very intense and is a critical success factor for its sugar business. Additional material requirements for the sugar cane milling process are either purchased locally or imported.

The Company generally purchases wheat, the principal raw material for its flour milling and pasta business, from suppliers in the United States, Canada and Australia.

The Company's policy is to maintain a number of suppliers for its raw and packaging materials to ensure a steady supply of quality materials at competitive prices. However, the prices paid for raw materials generally reflect external factors such as weather conditions, commodity market fluctuations, currency fluctuations and the effects of government agricultural programs. The Company believes that alternative sources of supply of the raw materials that it uses are readily available. The Company's policy is to maintain approximately 30 to 90 days of inventory.

Patents, Trademarks, Licenses, Franchises, Concessions or Labor Contract

The Company owns a substantial number of trademarks registered with the Bureau of Trademarks subject to the provisions of Republic Act (RA) 8293 also known as the Intellectual Property Code of the Philippines (IP Code) and recorded with the Intellectual Property Office of the Philippines (IPPHL). In addition, certain trademarks have been strategically registered in other countries in which it operates. These trademarks are important in the aggregate because brand name recognition is a key factor in the success of many of the Company's product lines. Trademark registration is a means to protect these brand names from counterfeiting and infringement.

Trademarks registered under RA 166, also known as the Trademark Law, are registered for twenty years. Upon renewal, these trademarks become subject to the IP Code having a registration period of ten years and renewable thereafter. In general, trademarks in other countries have a ten-year registration which are renewable as well, allowing relatively a lifetime of territorial and limited trademark registration.

The Company also uses brand names under licenses from third parties. These licensing arrangements are generally renewable based on mutual agreement. The Company's licensed brands include Nissin Cup Noodles, Nissin Yakisoba Instant Noodles and Nissin Pasta Express, Vitasoy, Calbee and B'lue, among others.

Licensing agreements are voluntarily registered with the Documentation, Information and Technology Transfer Bureau of the IPPHL.

Regulatory Overview

As manufacturer of consumer food and commodity food products, the Company is required to guarantee that the products are pure and safe for human consumption, and that the Company conforms to standards and quality measures prescribed by the Bureau of Food and Drugs (BFAD).

The Company's sugar mills are licensed to operate by the Sugar Regulatory Administration (SRA) and renew its sugar milling licenses at the start of every crop year. The Company is also registered with the Department of Energy as a manufacturer of bio-ethanol and as a renewable energy developer.

All of the Company's livestock and feed products have been registered with and approved by the Bureau of Animal Industry (BAI), an agency of the Department of Agriculture (DA) which prescribes standards, conducts quality control test of feed samples, and provides technical assistance to farmers and feed millers.

Some of the Company's projects, such as the sugar mill and refinery, bioethanol production, biomass power cogeneration and hog and poultry farm operations, are registered with the Board of Investments (BOI) which allows the Company certain fiscal and non-fiscal incentives.

Effects of Existing or Probable Governmental Regulations on the Business

The Company operates its businesses in a highly regulated environment. These businesses depend upon licenses issued by government authorities or agencies for their operations. The suspension or revocation of such licenses could materially and adversely affect the operation of these businesses.

Research and Development

The Company develops new products and variants of existing product lines, researches new processes and tests new equipment on a regular basis in order to maintain and improve the quality of the Company's food products. In Philippine operations alone, about P,=209 million was spent for research and development activities in 2021 and approximately P,=193 million and P,=144 million in 2020 and 2019, respectively.

The Company has research and development staff for its branded consumer foods and packaging divisions located in its research and development facility in Metro Manila and in each of its manufacturing facilities. In addition, the Company hires experts from all over the world to assist its research and development staff. The Company conducts extensive research and development for new products, line extensions for existing products and for improved production, quality control and packaging as well as customizing products to meet the local needs and tastes in the international markets. The Company's commodity foods segment also utilizes this research and development facility to improve their production and quality control. The Company also strives to capitalize on its existing joint ventures to effect technology transfers.

The Company has a dedicated research and development team for its agro-industrial business that continually explores advancements in feeds, breeding and farming technology. The Company regularly conducts market research and farm-test for all of its products. As a policy, no commercial product is released if it was not tested and used in Robina Farms.

Transactions with Related Parties

The largest shareholder, JG Summit Holdings, Inc. (JG Summit or JGSHI), is one of the largest and most diversified conglomerates listed on the Philippine Stock Exchange. JG Summit provides the Company with certain corporate center services including finance, strategy and development, government affairs, governance and management systems, internal audit, procurement, human resources, general counsel, information technology, digital transformation office, and advertising and public relations. JG Summit also provides the Company with valuable market expertise in the Philippines as well as intra-group synergies. See Note 35 to Consolidated Financial Statements for Related Party Transactions.

Costs and Effects of Compliance with Environmental Laws

The operations of the Company are subject to various laws and regulations enacted for the protection of the environment, including Philippine Clean Water Act (R.A. No. 9275), Clean Air Act (R.A. No. 8749), Ecological Solid Waste Management Act (R.A. No. 9003), Toxic Substances and Hazardous and Nuclear Wastes Control Act (R.A. No. 6969), Pollution Control Law (R.A. No. 3931, as amended by P.D. 984), the Environmental Impact Statement System (P.D. 1586), Laguna Lake Development Authority (LLDA) Act of 1966 (R.A. No. 4850), Renewable Energy Act (R.A. No. 9513), Electric Power Industry Reform Act (R.A. No. 9136) and Environmental Compliance Certificates (ECCs) requirements of P.D. No. 1586, in accordance with DENR Administrative Order No. 2003-30. The Company believes that it has complied with all applicable environmental laws and regulations, an example of which is the installation of wastewater treatment systems in its various facilities. Compliance with such laws does not have, and, in the Company's opinion, is not expected to have, a material effect upon the Company's capital expenditures, earnings or competitive position. As of December 31, 2021, the Company has invested about P,=420 million in wastewater treatment in its facilities in the Philippines.

Employees and Labor

As of December 31, 2021, the number of permanent full-time employees engaged in the Company's respective businesses is 13,894 and are deployed as follows:

Business	Company or Division	Number
Branded consumer foods	BCF, Packaging Division, URCI, URCCCL, NURC, UBVI, and USVI	10,461
Agro-industrial products	Farms, Animal Nutrition and Health; and Food, Drugs and Disinfectants	570
Commodity food products		
Sugar	Sugar	1,161
Flour & pasta	Flour	413
Bio-ethanol & renewable energy	Distillery and Cogeneration	659
Corporate		630
		13,894

For most of the companies and operating divisions, collective bargaining agreements between the relevant representatives of the employees' union and the subsidiary or divisions are in effect. The collective bargaining agreements generally cover a five-year term with a right to renegotiate the economic provisions of the agreement after three years, and contain provisions for annual salary increases, health and insurance benefits, and closed-shop arrangements. The collective bargaining agreements are with 26 different unions. For the year 2021, thirteen (13) collective bargaining agreements were signed and concluded with the labor unions which are as follows: Meat and Canning Division New Employees and Workers United Labor Organization, URC Labor Union Independent, BCFG Rank and File Union (United Labor Union URC El Salvador Plant), Kilusan sa Pakikibaka sa URC, URC Employees Union Farm Division, Continental Milling Company Workers Union, URC SURE - CARSUMCO Rank & File Union (Philippine Agricultural Commercial and Industrial Workers' Union - Trade Union Congress of the Philippines), URC SURE - CARSUMCO Supervisory Union (National Congress of Unions in the Sugar Industry of the Philippines - Trade Union Congress of the Philippines), PASSI Rank & File Union (Federation Free Workers), PASSI Supervisory Independent Union (Federation Free Workers), URSUMCO Supervisory Union (Congress of Independent - National Congress Unions in the Sugar Industry of the Philippines), SONEDCO Supervisory Union (Congress of Independent - National Congress Unions in the Sugar Industry of the Philippines) and Distillery Rank & File Union (Philippine Agricultural Commercial and Industrial Workers' Union - Trade Union Congress of the Philippines). The Company believes that good labor relations generally exist throughout the Company's subsidiaries and operating divisions.

The Company has a funded, noncontributory defined benefit retirement plan covering all of the regular employees of URC. The plan provides retirement, separation, disability and death benefits to its members. The Company, however, reserves the right to change the rate and amounts of its contribution at any time on account of business necessity or adverse economic conditions. The funds of the plan are administered and managed by the trustees. Retirement cost charged to operations, including net interest cost, amounted to P,=350 million, P,=263 million, and P,=351 million in 2021, 2020, and 2019, respectively.

Risks

The major business risks facing the Company and its subsidiaries are as follows:

1) Competition

The Company and its subsidiaries face competition in all segments of its businesses both in the Philippine market and in international markets where it operates. The Philippine food industry in general is highly competitive. Although the degree of competition and principal competitive factors vary among the different food industry segments in which the Company participates, the Company believes that the principal competitive factors include price, product quality, brand awareness and loyalty, distribution network, proximity of distribution outlets to customers, product variations and new product introductions. (See page 3, *Competition*, for more details)

The Company's ability to compete effectively is due to continuous efforts in sales and marketing of its existing products, development of new products and cost rationalization.

2) Financial Market

The Company has foreign exchange exposure primarily associated with fluctuations in the value of the Philippine Peso against the U.S. dollar and other foreign currencies. Majority of the Company's revenues are denominated in Pesos, while certain of its expenses, including debt services and raw material costs, are denominated in U.S. dollars or based on prices determined in U.S. dollars. In addition, portion of the Company's debt are denominated in foreign currencies. Prudent fund management is employed to minimize effects of fluctuations in interest and currency rates.

3) Raw Materials

The Company's production operations depend upon obtaining adequate supplies of raw materials on a timely basis. In addition, its profitability depends in part on the prices of raw materials since a portion of the Company's raw material requirements is imported, including packaging materials. To mitigate these risks, alternative sources of raw materials are used in the Company's operations. (See page 4, *Raw Materials*, for more details)

4) Food Safety Concerns

The Company's business could be adversely affected by the actual or alleged contamination or deterioration of certain of its flagship products, or of similar products produced by third parties. The risk of contamination or deterioration of its food products exists at each stage of the production cycle, including the purchase and delivery of food raw materials, the processing and packaging of food products, the stocking and delivery of the finished products to its customers, and the storage and display of finished products at the points of final sale. The Company conducts extensive research and development for new products, line extensions for existing products and for improved production, quality control and packaging as well as customizing products to meet the local needs and tastes in the international markets for its food business. For its agro-industrial business, its researchers are continually exploring advancements in breeding and farming technology. The Company regularly conducts market research and farm-test for all of its products. Moreover, the Company ensures that the products are safe for human consumption and that the Company conforms to standards and quality measures prescribed by regulatory bodies such as BFAD, SRA, BAI, and DA.

Mortalities

The Company’s agro-industrial business is subject to risks of outbreaks of various diseases. The Company faces the risk of outbreaks of foot and mouth disease and African Swine Fever (ASF), which is highly contagious and destructive to susceptible livestock such as hogs, and avian influenza or bird flu for its chicken farming business. These diseases and many other types could result in mortality losses. Disease control measures are adopted by the Company to minimize and manage this risk.

5) *Intellectual Property Rights*

Approximately 71.4% of the Company’s sale of goods and services in 2021 were from its branded consumer foods segment. The Company has put considerable efforts to protect the portfolio of intellectual property rights, including trademark registrations. Security measures are continuously taken to protect its patents, licenses and proprietary formulae against infringement and misappropriation.

6) *Weather and Catastrophe*

Severe weather conditions may have an impact on some aspects of the Company’s business, such as its sugar cane milling operations due to reduced availability of sugar cane. Weather condition may also affect the Company’s ability to obtain raw materials and the cost of those raw materials. Moreover, the Philippines has experienced a number of major natural catastrophes over the years including typhoons, droughts, volcanic eruptions, and earthquakes. The Company and its subsidiaries continually maintain sufficient inventory level to neutralize any shortfall of raw materials from major suppliers whether local or imported.

7) *Environmental Laws and Other Regulations*

The Company is subject to numerous environmental laws and regulations relating to the protection of the environment and human health and safety, among others. The nature of the Company’s operations will continue to subject it to increasingly stringent environmental laws and regulations that may increase the costs of operating its facilities above currently projected levels and may require future capital expenditures. The Company is continually complying with environmental laws and regulations, such as the wastewater treatment plants as required by the Department of Environment and Natural Resources, to lessen the effect of these risks.

The Company shall continue to adopt what it considers conservative financial and operational policies and controls to manage the various business risks it faces.

The Company intends to continuously expand the production and distribution of the branded consumer food products internationally through the addition of manufacturing facilities located in geographically desirable areas, especially in the ASEAN countries, the realignment of the production to take advantage of markets that are more efficient for production and sourcing of raw materials, and increased focus and support for exports to other markets from the manufacturing facilities. It also intends to enter into alliances with local raw material suppliers and distributors. Annual lease payments for rented properties amounted to P=128 million in 2021.

Item 3. Legal Proceedings

The Company is subject to lawsuits and legal actions in the ordinary course of its business. The Company or any of its subsidiaries is not a party to, and its properties are not the subject of, any material pending legal proceedings that could be expected to have a material adverse effect on the Company's financial position or results of operations.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the fourth quarter of the year covered by this report.

Item 6. Management's Discussion and Analysis or Plan of Operation

The following discussion should be read in conjunction with the accompanying consolidated financial statements and notes thereto, which form part of this Report. The consolidated financial statements and notes thereto have been prepared in accordance with the Philippine Financial Reporting Standards (PFRSs).

Results of Operations

Calendar Year 2021 Compared to Calendar Year 2020

URC generated a consolidated sale of goods and services of P,=116.955 billion for the year ended December 31, 2021, ahead by 3.4% against last year. Sale of goods and services performance by business segment follows:

- Sale of goods and services in URC's branded consumer foods group (BCFG), excluding packaging division, decreased by P,=566 million or 0.7% to P,=81.904 billion in 2021 from P,=82.470 billion registered in 2020. BCF domestic operations posted a decrease in net sales from P,=61.240 billion in 2020 to P,=59.734 billion in 2021 coming from high base in 2020 due to pantry-loading in the first half of the year driven by Taal eruption and the start of pandemic shifting household spending to pantry essentials. Economic environment also affected consumer behavior as seen in the category declines.

BCF international operations reported a 4.4% increase in net sales from P,=21.230 billion in 2020 to P,=22.170 billion in 2021 coming from strong growth momentum in the first half of the year, partially tapered by COVID-19 resurgence in the region. In constant US dollar (US\$) terms, sales increased by 5.3% driven by Indochina and Indonesia despite COVID challenges. Vietnam significantly grew by 12.0% driven by recovery in beverage sales particularly C2 while Thailand improved with 5.2% sales growth coming from strong domestic performance.

Sale of goods and services of BCFG, excluding packaging division, accounted for 70.0% of total URC consolidated sale of goods and services for 2021.

Sale of goods and services in URC's packaging division increased by 44.8% to P,=1.619 billion in 2021 from P,=1.118 billion recorded in 2020 due to better price and volume.

- Sale of goods and services in URC's agro-industrial group (AIG) amounted to P,=11.483 billion in 2021, a decline of 3.2% from P,=11.858 billion recorded in 2020. Feeds business increased by 5.6% due to double-digit growth in pet food, offsetting the decline in animal feeds. Farms business also decreased by 40.3% due to lower volumes as a result of downsized operations.
- Sale of goods and services in URC's commodity foods group (CFG) amounted to P,=21.949 billion in 2021, a 23.9% increase from P,=17.715 billion reported in 2020. Sugar business grew by 20.7% while renewables business grew by 64.4% driven by the acquisition of La Carlota mill and Roxol distillery in 4th quarter of 2020. Flour business posted a 4.5% increase due to better selling price despite low volume growth.

URC's cost of sales consists primarily of raw and packaging materials costs, manufacturing costs and direct labor costs. Cost of sales increased by P,=4.916 billion or 6.3% to P,=83.490 billion in 2021 from P,=78.573 billion recorded in 2020 due to higher sales and increasing input costs.

URC's gross profit for 2021 amounted to P,=33.465 billion, lower by P,=1.123 billion or 3.2% from P,=34.588 billion reported in 2020. Gross profit margin decreased by 195 basis points from 30.57% in 2020 to 28.61% in 2021.

URC's selling and distribution costs and general and administrative expenses consist primarily of compensation benefits, advertising and promotion costs, freight and other selling expenses, depreciation, repairs and maintenance expenses and other administrative expenses. Selling and distribution costs, and general and administrative expenses increased by P,=57 million or 0.3% to P,=20.749 billion in 2021 from P,=20.692 billion registered in 2020. The increase primarily resulted from increases in repairs and maintenance, professional and legal fees and other administrative expenses, partially offset by decreases in advertising and promotion costs; and taxes, licenses and fees.

As a result of the above factors, operating income decreased by P,=1.180 billion or 8.5% to P,=12.716 billion in 2021 from P,=13.896 billion reported in 2020. URC's operating income by segment was as follows:

- Operating income in URC's branded consumer foods segment, excluding packaging division, decreased by P,=909 million or 8.9% to P,=9.299 billion in 2021 from P,=10.208 billion in 2020. BCFG's domestic operations decline by 8.0% to P,=7.603 billion in 2021 from P,=8.262 billion in 2020 driven by cost headwinds from commodity prices, partially offset by pricing actions, mix improvements and cost savings initiatives. International operations posted a P,=1.696 billion operating income, 12.9% lower than the P,=1.947 billion posted in 2020 driven by increasing input prices and freight costs, and plant shutdowns due to Delta COVID variant surge in 3rd quarter of 2021. In constant US dollar terms, international operations posted an operating income of US\$ 34 million, a 12.3% decrease from last year.

URC's packaging division reported an operating income of P,=99 million in 2021 from an operating income of P,=522 thousand reported in 2020 driven by strong topline.

- Operating income in URC's agro-industrial segment decreased by P,=210 million or 15.3% to P,=1.165 billion in 2021 from P,=1.374 billion in 2020 driven by higher input costs.
- Operating income in URC's commodity foods segment decreased by P,=12 million or 0.3% to P,=4.351 billion in 2021 from P,=4.363 billion in 2020. Flour business decreased by 48.2% due to surging wheat prices. Sugar and renewables businesses grew by 16.4% and 24.9%, respectively, on the back of better volume and average selling price for all categories.

URC reported an EBITDA (operating income plus depreciation and amortization) from continuing operations of P,=18.479 billion in 2021, 7.9% lower than P,=20.054 billion posted in 2020.

URC's finance costs consist mainly of interest expense, which decreased by P,=88 million to P,=573 million in 2021 from P,=662 million recorded in 2020 due to lower interest rates and decline in level of interest-bearing financial liabilities.

URC's finance revenue consists of interest income from investments in financial instruments, money market placements, savings and dollar deposits and dividend income from investment in equity securities. Finance revenue decreased by P,=68 million to P,=255 million in 2021 from P,=324 million in 2020 due to lower interest rates, decline in level of interest-bearing financial assets and lower dividend income.

Equity in net losses of joint ventures increased to P,=91 million in 2021 from P,=62 million in 2020 due to equity take-up in net losses of DURBI.

Net foreign exchange gain amounted to P,=346 million in 2021 from the P,=504 million net foreign exchanges loss reported in 2020 driven by combined effects of local currency devaluations vis-à-vis US dollar this year versus local currency revaluations last year particularly Philippine Peso and Myanmar Kyat.

Market valuation gain on financial instruments at fair value through profit or loss decreased to P,=87 million in 2021 from P,=136 million in 2020 driven by market valuation on derivative liability last year.

Impairment losses increased to P,=572 million in 2021 from P,=33 million in 2020 due to provision for impairment losses on idle fixed assets and slow-moving spare parts .

Other income (losses) - net consists of gain (loss) on sale of fixed assets, rental income, and miscellaneous income and expenses. Other income - net amounted to P,=2.375 billion in 2021 from other losses - net of P,=619 million reported in 2020 mainly coming from gain on sale of fixed assets recognized this year.

URC recognized provision for income tax of P,=1.579 billion in 2021, a 20.0% decrease from P,=1.973 billion in 2020 due to savings from CREATE Act and reversal of deferred tax assets last year.

URC's net income from continuing operations amounted to P,=12.965 billion in 2021, higher by P,=2.461 billion or 23.4%, from P,=10.504 billion in 2020 mainly driven by gain on sale of idle assets, foreign exchange gain, and income tax savings from CREATE Act.

URC's net income from discontinued operations amounted to P,=11.281 billion in 2021, an increase of P,=10.160 billion from P,=1.120 billion recorded in 2020 driven by the gain recognized from the divestment of Oceania businesses this year.

URC reported total net income of P,=24.246 billion in 2021, higher by P,=12.621 billion or 108.6% from P,=11.625 billion in 2020.

URC's core earnings after tax (operating profit after equity earnings, net finance costs, other income - net and provision from income tax) in 2021 amounted to P,=11.582 billion, and decrease of 7.1% from P,=12.463 billion recorded in 2020.

Net income attributable to equity holders of the parent increased by P,=12.577 billion or 117.0% to P,=23.324 billion in 2021 from P,=10.747 billion in 2020 as a result of the factors discussed above.

Non-controlling interest (NCI) represents primarily the share in the net income (loss) attributable to non-controlling interest of Nissin-URC (51.0%-owned). NCI in net income of subsidiaries increased from P,=878 million in 2020 to P,=922 million in 2021.

Calendar Year 2020 Compared to Calendar Year 2019

URC generated a consolidated sale of goods and services of P,=113.162 billion for the year ended December 31, 2020, a slight decline of 1.1% against 2019. Sale of goods and services performance by business segment follows:

- Sale of goods and services in URC's branded consumer foods group (BCFG), excluding packaging division, decreased by P,=2.848 billion or 3.3% to P,=82.470 billion in 2020 from P,=85.318 billion registered in 2019. BCFG domestic operations posted a slight decrease in net sales from P,=61.535 billion in 2019 to P,=61.240 billion in 2020 due to decline in dependent out-of-home

consumption categories such as RTD beverages and candies, partially offset by growth in snacks, noodles and other filler type categories.

BCF international operations reported a 10.7% decrease in net sales from P,=23.783 billion in 2019 to P,=21.230 billion in 2020. In constant US dollar (US\$) terms, sales decreased by 6.3% mainly driven by challenged sales of Vietnam and Thailand. Vietnam sales declined by 13.4% mainly driven by slowdown in beverages as C2 sales was unable to fully pull through despite recovery in the 2nd half of the year and Rong Do remained challenged due to school closures. Thailand sales decreased by 3.2% due to soft domestic consumption.

Sale of goods and services of BCFG, excluding packaging division, accounted for 70.5% of total URC consolidated sale of goods and services for 2020.

Sale of goods and services in URC's packaging division decreased by 15.5% to P,=1.118 billion in 2020 from P,=1.324 billion recorded in 2019 due to lower selling price and volume.

- Sale of goods and services in URC's agro-industrial group (AIG) amounted to P,=11.858 billion in 2020, a decline of 9.7% from P,=13.138 billion recorded in 2019. Feeds business decreased by 3.5% due to lower volumes while Farms business decreased by 24.2% due to lower volumes as a result of downsized operations.
- Sale of goods and services in URC's commodity foods group (CFG) amounted to P,=17.715 billion in 2020, a 21.1% increase from P,=14.623 billion reported in 2019. Sugar business grew by 33.5% due to higher volumes and renewables business grew by 29.8% driven by higher average selling price. The acquisition of Central Azucarera de La Carlota and Roxol Bioenergy Corporation contributed to the growth of Sugar and Renewables businesses. Flour business posted a 1.8% decrease due to lower volumes, partially offset by better average selling price.

URC's cost of sales consists primarily of raw and packaging materials costs, manufacturing costs and direct labor costs. Cost of sales decreased by P,=2.066 billion or 2.6% to P,=78.573 billion in 2020 from P,=80.639 billion recorded in 2019 due to lower input costs and packaging materials, and forex impact.

URC's gross profit for 2020 amounted to P,=34.588 billion, higher by P,=824 million or 2.4% from P,=33.764 billion reported in 2019. Gross profit margin increased by 105 basis points from 29.51% in 2019 to 30.57% in 2020.

URC's selling and distribution costs and general and administrative expenses consist primarily of compensation benefits, advertising and promotion costs, freight and other selling expenses, depreciation, repairs and maintenance expenses and other administrative expenses. Selling and distribution costs, and general and administrative expenses decreased by P,=329 million or 1.6% to P,=20.692 billion in 2020 from P,=21.021 billion registered in 2019. This decrease resulted primarily from the following factors:

- 2.5% or P,=183 million decrease in advertising and promotions to P,=7.270 billion in 2020 from P,=7.453 billion in 2019 due to controlled spending.
- 1.7% or P,=115 million decrease in freight and other selling expenses to P,=6.642 billion in 2020 from P,=6.757 billion in 2019 due to lower freight cost and logistic efficiencies.

- 46.3% or P,=62 million decrease in travel and transportation to P,=72 million in 2020 from P,=134 million in 2019 due to imposition of strict travel guidelines due to COVID-19.
- 54.9% or P,=190 million increase in repairs and maintenance to P,=536 million in 2020 from P,=346 million in 2019 due to higher software and hardware maintenance costs.

As a result of the above factors, operating income increased by P,=1.153 billion or 9.1% to P,=13.896 billion in 2020 from P,=12.743 billion reported in 2019. URC's operating income by segment was as follows:

- Operating income in URC's branded consumer foods segment, excluding packaging division, increased by P,=363 million or 3.7% to P,=10.208 billion in 2020 from P,=9.846 billion in 2019. BCFG's domestic operations went up by 6.3% to P,=8.262 billion in 2020 from P,=7.775 billion in 2019 driven by better price and cost mix, and tempered input costs. International operations posted a P,=1.947 billion operating income in 2020, 6.0% lower than the P,=2.070 billion posted in 2019 driven by forex devaluations. In constant US dollar terms, international operations posted an operating income of US\$39 million, a 1.4% decrease from previous year.

URC's packaging division reported an operating income of P,=522 thousand in 2020 from an operating loss of P,=42 million reported in 2019 due to better margins.

- Operating income in URC's agro-industrial segment increased by P,=487 million or 54.9% to P,=1.374 billion in 2020 from P,=887 million in 2019 driven by better margins and controlled operating expenses in both feeds and farms businesses.
- Operating income in URC's commodity foods segment increased by P,=439 million or 11.2% to P,=4.363 billion in 2020 from P,=3.924 billion in 2019. Flour business increased by 10.0% due to lower materials costs and operating expenses. Sugar business grew by 0.3% due to higher volume despite lower margins and higher expenses. Renewables business increased by 71.8% due to higher average selling price of distillery segment.

URC reported an EBITDA (operating income plus depreciation and amortization) from continuing operations of P,=20.054 billion in 2020, 6.4% higher than P,=18.851 billion posted in 2019.

URC's finance costs consist mainly of interest expense, which increased by P,=15 million to P,=662 million in 2020 from P,=647 million recorded in 2019 due to increase in interest expense related to additional lease contracts qualifying under PFRS 16 in 2020.

URC's finance revenue consists of interest income from investments in financial instruments, money market placements, savings and dollar deposits and dividend income from investment in equity securities. Finance revenue increased by P,=38 million to P,=324 million in 2020 from P,=286 million in 2019 due to higher dividend income.

Equity in net losses of joint ventures decreased to P,=62 million in 2020 from P,=178 million in 2019 due to lower share in net losses from VURCI and DURBI.

Net foreign exchange loss increased to P,=504 million in 2020 from the P,=487 million reported in 2019 due to appreciation of Philippine peso against US dollar.

Market valuation gain (loss) on financial instruments at fair value through profit or loss increased to P,=136 million gain in 2020 from P,=5 million loss in 2019 due to increase in market values of equity investments and decrease in fair value of derivative liability.

Impairment losses increased to P,=33 million in 2020 from P,=2 million in 2019 due to higher provision for impairment of receivables.

Other losses - net consists of gain (loss) on sale of fixed assets, amortization of bond issue costs, rental income, and miscellaneous income and expenses. Other losses - net amounted to P,=619 million in 2020, higher than the P,=339 million reported in 2019 mainly due to higher restructuring costs recognized in 2020.

URC recognized provision for income tax of P,=1.973 billion in 2020, a 21.8% increase from P,=1.620 billion in 2019 due to reversal of deferred tax assets on realized foreign exchange losses and realized restructuring costs.

URC's net income from continuing operations amounted to P,=10.504 billion in 2020, higher by P,=754 million or 7.7%, from P,=9.750 billion in 2019 mainly driven by higher operating income and lower net finance costs.

URC's net income from discontinued operations amounted to P,=1.120 billion in 2020, an increase of 207.4% from P,=365 million recorded in 2019 due to strong performance of Oceania businesses.

URC reported total net income of P,=11.625 billion in 2020, higher by P,=1.510 billion or 14.9% from P,=10.115 billion in 2019.

URC's core earnings after tax (operating profit after equity earnings, net finance costs, other losses - net and provision for income tax) in 2020 amounted to P,=12.463 billion, an increase of 10.7% from P,=11.261 billion recorded in 2019.

Net income attributable to equity holders of the parent increased by P,=975 million or 10.0% to P,=10.747 billion in 2020 from P,=9.772 billion in 2019 as a result of the factors discussed above.

Non-controlling interest (NCI) represents primarily the share in the net income (loss) attributable to non-controlling interest of Nissin-URC (51.0%-owned) and Unisnack Holding Company Ltd. (60.0%-owned). NCI in net income of subsidiaries increased from P,=343 million in 2019 to P,=878 million in 2020.

Calendar Year 2019 Compared to Calendar Year 2018

URC generated a consolidated sale of goods and services of P,=114.403 billion for the year ended December 31, 2019, a 7.0% sales growth over previous year. Sale of goods and services performance by business segment follows:

- Sale of goods and services in URC's branded consumer foods group (BCFG), excluding packaging division, increased by P,=4.601 billion or 5.7% to P,=84.791 billion in 2019 from P,=80.190 billion registered in 2018. BCFG domestic operations posted a 7.9% increase in net sales from P,=57.811 billion in 2018 to P,=62.405 billion in 2019 due to growth across different key categories supported by strong consumer demand and sales and distribution transformation, which brought a successful coffee turn-around, sustained growth performance in snacks and noodles, and recovery of RTD beverages.

BCF international operations net sales is flat from P,=22.379 billion in 2018 to P,=22.387 billion in 2019. In constant US dollar (US\$) terms, sales grew by 1.0% driven by strong performance in Vietnam, partially offset by challenged sales in Thailand. Vietnam recovered with stronger growth of 8.9% driven by C2 with significant contributions from new product launches, partly offset by decline in Rong Do. Thailand sales decreased by 5.6% driven by decline in biscuits and wafers while exports grew due

to strong sales to Cambodia. Thailand's performance remains challenged as the economy continues to affect consumer sentiment.

Sale of goods and services of BCFG, excluding packaging division, accounted for 72.5% of total URC consolidated sale of goods and services for 2019.

Sale of goods and services in URC's packaging division decreased by 13.1% to P,=1.324 billion in 2019 from P,=1.524 billion recorded in 2018 due to lower selling price and volume.

- Sale of goods and services in URC's agro-industrial group (AIG) amounted to P,=13.138 billion in 2019, a 12.4% increase from P,=11.693 billion recorded in 2018. Feeds business grew by 34.6% due to higher sales volume and improved selling prices across all feed categories while Farms business weakened by 18.8% due to lower volume in hogs despite increase in sales volume of poultry.
- Sale of goods and services in URC's commodity foods group (CFG) amounted to P,=15.150 billion in 2019 or up by 11.9% from P,=13.539 billion reported in 2018. Sugar business grew by 8.0% due to higher volumes in raw sugar despite lower volume in refined sugar coupled with lower prices for both raw and refined sugar. Renewables business slightly declined by 1.5% due to lower volume of molasses. Flour business also posted higher sales by 25.5% driven by volume growth.

URC's cost of sales consists primarily of raw and packaging materials costs, manufacturing costs and direct labor costs. Cost of sales increased by P,=3.735 billion, or 4.9%, to P,=80.639 billion in 2019 from P,=76.904 billion recorded in 2018 due to higher sales, partially offset by lower costs of commodities and other raw and packaging materials.

URC's gross profit for 2019 amounted to P,=33.764 billion, higher by P,=3.722 billion or 12.4% from P,=30.042 billion reported in 2018. Gross profit margin increased by 142 basis points from 28.09% in 2018 to 29.51% in 2019.

URC's selling and distribution costs, and general and administrative expenses consist primarily of compensation benefits, advertising and promotion costs, freight and other selling expenses, depreciation, repairs and maintenance expenses and other administrative expenses. Selling and distribution costs, and general and administrative expenses increased by P,=1.761 billion or 9.1% to P,=21.021 billion in 2019 from P,=19.260 billion registered in 2018. This increase resulted primarily from the following factors:

- 16.7% or P,=1.065 billion increase in advertising and promotions to P,=7.453 billion in 2019 from P,=6.388 billion in 2018 due to higher consumer promotions and trade development activities to boost sales.
- 36.9% or P,=236 million increase in depreciation and amortization expense to P,=875 million in 2019 from P,=639 million in 2018 due to capital expenditures and impact of PFRS 16.
- 1.8% or P,=117 million increase in freight and other selling expense to P,=6.757 billion in 2019 from P,=6.641 billion in 2018 due to higher volume.
- 4.1% or P,=155 million increase in personnel expenses to P,=3.946 billion in 2019 from P,=3.790 billion in 2018 due to higher pension cost.
- 35.5% or P,=86 million increase in contracted services to P,=328 million in 2019 from P,=242 million in 2018 due to consolidation of USVI and higher shared service costs.

As a result of the above factors, operating income increased by P,=1.960 billion, or 18.2% to P,=12.743 billion in 2019 from P,=10.783 billion reported in 2018. URC's operating income by segment was as follows:

- Operating income in URC's branded consumer foods segment, excluding packaging division, increased by P,=1.504 billion or 18.1% to P,=9.795 billion in 2019 from P,=8.292 billion in 2018. BCFG's domestic operations went up by 12.4% to P,=8.032 billion in 2019 from P,=7.143 billion in 2018 due to higher volumes and cost improvement. International operations posted a P,=1.764 billion operating income, 53.6% higher than P,=1.149 billion posted in 2018. In constant US dollar terms, international operations posted an operating income of US\$34 million, a 48.6% increase from 2018 due to better margins from key markets.

URC's packaging division reported an operating loss of P,=42 million in 2019 from an operating income of P,=29 million reported in 2018 due to lower margins from lower selling price despite improved cost of production, coupled with higher repairs and maintenance costs.

- Operating income in URC's agro-industrial segment increased by P,=69 million to P,=887 million in 2019 from P,=818 million in 2018 driven by higher volumes and prices in feeds despite lower volumes in farms as a result of the African swine flu scare since August 2019, coupled with higher input costs.
- Operating income in URC's commodity foods segment increased by P,=435 million or 12.3% to P,=3.974 billion in 2019 from P,=3.539 billion in 2018. Flour business increased by 29.6% due to higher volumes, lower wheat costs and savings from operating expenses. Sugar business grew by 31.8% due to improved selling price and higher volume while renewable energy business decreased by 33.3% due to higher repairs and maintenance cost and increase in molasses price.

URC reported an EBITDA (operating income plus depreciation and amortization) from continuing operations of P,=18.851 billion in 2019, 16.7% higher than P,=16.150 billion posted in 2018.

URC's finance costs consist mainly of interest expense which increased by P,=340 million or 110.8% to P,=647 million in 2019 from P,=307 million recorded in 2018 due to higher level of trust receipts payable and recognition of interest expense related to PFRS 16 in 2019.

URC's finance revenue consists of interest income from investments in financial instruments, money market placements, savings and dollar deposits and dividend income from investment in equity securities. Finance revenue increased to P,=286 million in 2019 from P,=279 million in 2018 due to higher level of financial assets during the year.

Equity in net losses of joint ventures increased to P,=178 million in 2019 from P,=147 million in 2018 due to recognition of net losses of DURBI in 2019.

Net foreign exchange loss amounted to P,=487 million in 2019 from P,=196 million reported in 2018 due to the combined effects of appreciation of international subsidiaries' local currencies against US dollar, particularly Indonesian Rupiah, and appreciation of Philippine peso against US dollar.

Market valuation loss on financial instruments at fair value through profit or loss decreased to P,=5 million in 2019 from P,=35 million in 2018 due to lower decrease in market values of equity investments.

Impairment losses decreased to P,=2 million in 2019 from P,=45 million in 2018 due to lower impairment in receivables and impairment of goodwill related to Advanson in 2018.

Other income (expenses) - net consists of gain (loss) on sale of fixed assets, amortization of bond issue costs, rental income, and miscellaneous income and expenses. Other expense - net amounted to P,=339 million in 2019 from P,=80 million other income - net reported in 2018 mainly due to restructuring provisions in 2019.

URC recognized provision for income tax of P,=1.620 billion in 2019, a 4.5% decrease from P,=1.697 billion in 2018 due to recognition of deferred tax asset on unrealized forex loss and restructuring provisions.

URC's net income from continuing operations amounted to P,=9.750 billion, higher by P,=1.035 billion or 11.9%, from P,=8.716 billion for 2018 mainly driven by higher operating income, reduced by higher net foreign exchange losses and recognition of restructuring provisions.

URC's net income from discontinued operations for 2019 amounted to P,=364 million, a decrease of 51.2% from P,=747 million recorded in 2018.

URC reported total net income P,=10.115 billion in 2019, higher by P,=652 million or 6.9% from P,=9.463 billion in 2018.

URC's core earnings after tax (operating profit after equity earnings, net finance costs, other expenses - net and provision for income tax) in 2019 amounted to P,=11.261 billion, an increase of 20.1% from P,=9.375 billion recorded in 2018.

Net income attributable to equity holders of the parent increased by P,=568 million or 6.2% to P,=9.772 billion in 2019 from P,=9.204 billion in 2018 as a result of the factors discussed above.

Non-controlling interest (NCI) represents primarily the share in the net income (loss) attributable to non-controlling interest of Nissin-URC, URC's 51.0%-owned subsidiary. NCI in net income of subsidiaries increased from P,=258 million in 2018 to P,=343 million in 2019.

Financial Condition

URC's financial position remains healthy with strong cash levels. The Company has a current ratio of 1.73:1 as of December 31, 2021, higher than the 1.22:1 as of December 31, 2020. Financial debt to equity ratio of 0.14 as of December 31, 2021 is within comfortable level. The Company is in a net asset position of P,=1.714 billion this year against the net debt position of P,=22.093 billion last year.

Total assets amounted to P,=152.657 billion as of December 31, 2021, lower than P,=176.195 billion as of December 31, 2020. Book value per share increased to P,=49.71 as of December 31, 2021 from P,=41.86 as of December 31, 2020.

The Company's cash requirements have been sourced through cash flow from operations. The net cash flow provided by operating activities in 2021 amounted to P,=13.466 billion. Net cash used in investing activities amounted to P,=11.630 billion, which were substantially used for fixed asset acquisitions. Net cash used in financing activities amounted to P,=3.745 billion due to dividend payment, partly offset by short-term debt availments.

The capital expenditures amounting to P,=13.200 billion include land, site development, warehouse and building constructions and rehabilitation/upgrade of beverage, snacks, candies and chocolate facilities in the Philippines; various capacity upgrades and sustainability projects in Thailand and Vietnam; new production line in Malaysia; new site location for Flour; upgrades and expansion of milling capacity and refinery in Sugar; rehabilitation of boiler in Distillery; expansion of feedmill and farm houses in Agro-Industrial Group; and improvement of information systems in Corporate business.

The Company has budgeted various authorized but not yet disbursed capital expenditures (including maintenance capex) and investments for 2022, which substantially consist of the following:

- Acquisition of new site, capacity expansions and improvement of information systems, handling, distribution, safety, quality control and operational efficiencies throughout the branded consumers foods group;
- Improvement and maintenance capital expenditures for flour mill and sugar and business expansion for renewables;
- Capacity expansion and maintenance expenditures for agro-industrial group and facilities improvement for packaging business; and
- Upgrade of information systems for corporate business

No assurance can be given that the Company's capital expenditure plan will not change or that the amount of capital expenditure for any project or as a whole will not change in future years from current expectations.

As of December 31, 2021, the Company is not aware of any events that will trigger direct or contingent financial obligation that is material to the Company, including any default or acceleration of an obligation.

**STATEMENT OF MANAGEMENT’S RESPONSIBILITY
FOR CONSOLIDATED FINANCIAL STATEMENTS**

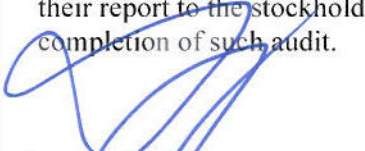

The management of Universal Robina Corporation and Subsidiaries (the Group) is responsible for the preparation and fair presentation of the consolidated financial statements, including the schedules attached therein, for the years ended December 31, 2021, 2020 and 2019, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative to do so.

The Board of Directors is responsible for overseeing the Group’s financial reporting process.

The Board of Directors reviews and approves the consolidated financial statements, including the schedules attached therein, and submits the same to the stockholders.

Sycip, Gorres, Velayo and Co., the independent auditors appointed by the stockholders, have audited the consolidated financial statements in accordance with Philippine Standards on Auditing, and in their report to the stockholders, have expressed their opinion on the fairness of presentation upon completion of such audit.

INDEPENDENT AUDITOR'S REPORT

The Stockholders and the Board of Directors
Universal Robina Corporation
8th Floor, Tera Tower, Bridgetowne

Opinion

We have audited the consolidated financial statements of Universal Robina Corporation and its subsidiaries (the Group), which comprise the consolidated statements of financial position as at December 31, 2021 and 2020, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended December 31, 2021 and the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended December 31, 2021 in accordance with Philippine Financial Reporting Standards (PFRSs).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

A key audit matter is one that, in our professional judgment, was of most significance in our audit of the consolidated financial statements of the current period. The matter below was addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter. The description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Recoverability of Goodwill and Intangible Assets

Under Philippine Accounting Standard (PAS) 36, *Impairment of Assets*, the Group is required to perform annual impairment tests on its goodwill and intangible assets with indefinite useful lives. As of December 31, 2021, the Group's goodwill attributable to the acquisition of Crunchy Foods Sdn. Bhd. and Subsidiaries and other acquired entities amounted to ₱20.5 billion. The Group's intangible assets with indefinite useful lives consist of brands and trademarks and product formulation amounting to ₱1.3 billion and ₱0.5 billion, respectively. The annual impairment test is significant to our audit because: (a) the balances of goodwill and intangible assets with indefinite useful lives are material to the consolidated financial statements; and (b) management's assessment process requires significant judgment and is based on assumptions which are subject to higher level of estimation uncertainty due to the current economic conditions which have been impacted by the coronavirus pandemic, specifically revenue growth rate, discount rate and the terminal growth rate that are applied to the cash flow forecasts.

The Group's disclosures about goodwill and other intangible assets with indefinite lives are included in Notes 3 and 15 to the consolidated financial statements.

Audit response

We evaluated the methodologies used and the management's assumptions by comparing the key assumptions used such as revenue growth rate and the terminal growth rate against the historical performance of the cash generating unit (CGU), industry/market outlook and other relevant external data, taking into consideration the impact associated with coronavirus pandemic.. We also assessed the reasonableness of the discount rate used by comparing these against entities with similar risk profiles, capital structures, industries and market information. We also reviewed the Group's disclosures about those assumptions to which the outcome of the impairment test is most sensitive, specifically those that have the most significant effect on the determination of the recoverable amount of goodwill and intangible assets with indefinite useful lives.

Accounting for Acquisition of Crunchy Foods Sdn. Bhd. and Subsidiaries

In December 2021, the Group acquired 100% ownership interest in Crunchy Foods Sdn. Bhd. ('Crunchy Foods') from Crunchy Limited, for a total consideration of ₱24.6 billion. Crunchy Foods owns Munchy Food Industries Sdn. Bhd. and its subsidiary Munchworld Marketing Sdn. Bhd., collectively referred to as the 'Munchy's Group'.

This matter is significant to our audit because of the amount of purchase price consideration and the judgments, estimates and complexity involved in the purchase price allocation, which resulted to a provisional goodwill of ₱20.5 billion as of December 31, 2021.

The disclosures in relation to the acquisition of Munchy's Group are included in Note 15 to the consolidated financial statements.

Audit response

We have discussed with management the valuation methodologies and inputs used in the provisional purchase price allocation, and reviewed the share purchase agreement covering the acquisition. We reviewed the basis and assumptions for estimates of the amount of recognized brands amounting to ₱1.3 billion, which we compared against available market data in the country where it is situated. We also reviewed in detail the information used by management in the allocation, particularly the brand performance of Munchy's in Malaysia. We have also assessed and validated the adequacy and appropriateness of the related disclosures in the consolidated financial statements.

Divestment of Oceania Businesses

In October 2021, the Group sold its remaining 60% ownership interest in Uni Snack Holding Company Ltd. and its subsidiaries (collectively, the 'Oceania businesses') to a third party, for a total consideration of ₱24.0 billion. Upon completion of the closing conditions, the Group relinquished its control and ownership over the Oceania businesses and the latter has been deconsolidated from the consolidated financial statements. Moreover, the results of the Oceania businesses' operations were presented as discontinued operations in the consolidated statements of income for the years ended December 31, 2021, 2020 and 2019.

The Group's disclosures about the divestment of the Oceania businesses are included in Note 33 to the consolidated financial statements.

This transaction is significant to our audit as the amounts involved are material to the consolidated financial statements. Further, accounting for this transaction required significant management judgment, particularly on the classification of the Oceania businesses as a discontinued operation.

Audit response

We obtained and reviewed the relevant contracts and agreements pertaining to the transactions. We reviewed the assets and liabilities to be deconsolidated as at the date of loss of control, including the results of operations of the Oceania businesses for the 10-month period ended October 29, 2021. We evaluated the Group's basis for classifying the former subsidiaries as a discontinued operation by checking whether the operations and cash flows of the Oceania businesses can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the Group. Furthermore, we reviewed the presentation and disclosures in the notes to the consolidated financial statements.

Other Information

Management is responsible for the other information. The other information comprises the SEC Form 17-A for the year ended December 31, 2021 (but does not include the consolidated financial statements and our auditor's report thereon), which we obtained prior to the date of this auditor's report, and the SEC Form 20-IS (Definitive Information Statement) and Annual Report for the year ended December 31, 2021, which are expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

UNIVERSAL ROBINA CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate Information

Universal Robina Corporation (hereinafter referred to as “the Parent Company” or “URC”) was incorporated on September 28, 1954, domiciled in the Republic of the Philippines, and is listed in the Philippine Stock Exchange. On October 28, 2002, the Parent Company’s corporate life was extended for another 50 years or until September 28, 2054. The registered office address of the Parent Company is at 8th Floor Tera Tower, Bridgetowne, E. Rodriguez, Jr. Avenue (C5 Road), Ugong Norte, Quezon City, Metro Manila.

The Parent Company is a majority owned subsidiary of JG Summit Holdings, Inc. (“the Ultimate Parent Company” or “JGSHI”).

The Parent Company and its subsidiaries (hereinafter referred to as “the Group”) is one of the largest branded food products companies in the Philippines and has a strong presence in ASEAN markets. The Group is involved in a wide range of food-related businesses which are organized into three (3) business segments: (a) the branded consumer food segment which manufactures and distributes a diverse mix of salty snacks, chocolates, candies, biscuits, packed cakes, beverages, instant noodles and pasta; (b) the agro-industrial segment which engages in hog and poultry farming, production and distribution of animal health products and manufacture and distribution of animal feeds, glucose and soya bean products; and (c) the commodity food segment which engages in sugar milling and refining, flour milling and pasta manufacturing, and renewable energy development. The Parent Company also engages in the manufacture of bi-axially oriented polypropylene (BOPP) films for packaging companies and flexible packaging materials to cater various URC branded products. The Parent Company’s packaging business is included in the branded consumer food segment.

The operations of certain subsidiaries are registered with the Board of Investments (BOI) as preferred pioneer and nonpioneer activities. Under the terms of the registrations and subject to certain requirements, the Parent Company and certain subsidiaries are entitled to certain fiscal and non-fiscal incentives, including among others, an income tax holiday (ITH) for a period of three (3) years to seven (7) years from respective start dates of commercial operations (see Note 36).

The Group is also subject to certain regulations with respect to, among others, product composition, packaging, labeling, advertising and safety.

The principal activities of the Group are further described in Note 6.

2. Summary of Significant Accounting Policies

Basis of Preparation

The accompanying consolidated financial statements of the Group have been prepared on a historical cost basis, except for financial assets at fair value through profit or loss (FVTPL), financial assets at fair value through other comprehensive income (FVOCI) and derivative financial instruments that have been measured at fair value, inventories that have been measured at lower of cost and net realizable value (NRV) and biological assets and agricultural produce that have been measured at fair value less estimated costs to sell.

The consolidated financial statements of the Group are presented in Philippine Peso. The functional and presentation currency of the Parent Company and its Philippine subsidiaries is the Philippine Peso. All values are rounded to the nearest peso except when otherwise stated.

The functional currencies of the Group's consolidated foreign subsidiaries follow:

On December 23, 2019, Intersnack, a European enterprise engaged in the savory snacks market with an extensive product portfolio, bought 40% of Oceania businesses (SBA and Griffin's), which resulted in the reduction of URC's ownership interest in Oceania from 100% to 60% (see Note 22). Further, on October 29, 2021, URC sold its remaining 60% ownership interest to Intersnack (see Note 33).

Control

Control is achieved when the Group is exposed, or has rights to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Parent Company obtains control over the subsidiary and ceases when the Parent Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of financial position and consolidated statement of comprehensive income from the date the Parent Company gains control until the date it ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent of the Group and to the non-controlling interests, even if this results in the non-controlling interest having deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Group.

All intragroup transactions, balances, income and expenses are eliminated in the consolidation.

Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the Group's equity therein. The interest of non-controlling shareholders may be initially measured at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets. The choice of measurement basis is made on an acquisition-by-acquisition basis. Subsequent to acquisition, non-controlling interests consist of the amount attributed to such interests at initial recognition and the non-controlling interest's share of changes in equity since the date of the combination.

Any changes in the Group's ownership interest in subsidiary that does not result in a loss of control is accounted for as equity transactions. Any difference between the amount by which the non-controlling interest is adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the equity holders of the Parent Company.

If the Group loses control over a subsidiary, it:

- derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- derecognizes the carrying amount of any non-controlling interest;
- derecognizes the related other comprehensive income recorded in equity and recycles the same to profit or loss or retained earnings;
- recognizes the fair value of the consideration received;
- recognizes the fair value of any investment retained;
- recognizes any surplus or deficit in the consolidated statement of income; and
- reclassifies the Parent Company's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

The financial statements of the subsidiaries are prepared for the same reporting period as the Parent Company, using consistent accounting policies. Some of the Group's subsidiaries have a local statutory accounting reference date of September 30. These are consolidated using management prepared information on a basis coterminous with the Group's accounting reference date.

Below are the subsidiaries with a different accounting reference date from that of the Parent Company:

<u>Subsidiaries*</u>	<u>Year-end</u>
Bio-resource Power Generation Corporation	September 30
Southern Negros Development Corporation	-do-
Najalin Agri-Ventures, Inc.	-do-

**Dormant/non-operating subsidiaries*

Business Combinations

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured at the aggregate of the fair values, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree. This policy also covers purchase of assets that constitutes acquisition of a business.

For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are recognized in profit or loss in the consolidated statement of income as incurred.

Where appropriate, the cost of acquisition includes any asset or liability resulting from a contingent consideration arrangement, measured at its acquisition-date fair value. Subsequent changes in such fair values are adjusted against the cost of acquisition where they qualify as measurement period adjustments. All other subsequent changes in the fair value of contingent consideration classified as an asset or liability are accounted for in accordance with relevant PFRSs. Changes in the fair value of contingent consideration classified as equity are not recognized.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in profit or loss.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that if known, would have affected the amounts recognized as of that date. The measurement period is the period from the date of acquisition to the date the Group receives complete information about facts and circumstances that existed as of the acquisition date and is subject to a maximum period of one year.

If the business combination is achieved in stages, the Group's previously-held interests in the acquired entity are remeasured to fair value at the acquisition date (the date the Group attains control) and the resulting gain or loss, if any, is recognized in the consolidated statement of income. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.

Combinations of Entities under Common Control

Where there are business combinations involving entities that are ultimately controlled by the same ultimate parent (i.e., Controlling Shareholders) before and after the business combination and that the control is not transitory ("business combinations under common control"), the Group accounts for such business combinations in accordance with the guidance provided by the Philippine Interpretations Committee Q&A No. 2011-02, PFRS 3.2 - *Common Control Business Combinations*. The purchase method of accounting is used, if the transaction was deemed to have substance from the perspective of the reporting entity. In determining whether the business combination has substance, factors such as the underlying purpose of the business combination and the involvement of parties other than the combining entities such as the non-controlling interest, shall be considered. In cases where the transaction has no commercial substance, the business combination is accounted for using the pooling of interests method.

In applying the pooling of interests method, the Group follows the Philippine Interpretations Committee Q&A No. 2012-01, PFRS 3.2 - *Application of the Pooling of Interests Method for Business Combinations of Entities under Common Control in Consolidated Financial Statements*, which provides the following guidance:

- The assets and liabilities of the combining entities are reflected in the consolidated financial statements at their carrying amounts. No adjustments are made to reflect fair values, or recognize any new assets or liabilities, at the date of the combination. The only adjustments that are made are those adjustments to harmonize accounting policies.

- No new goodwill is recognized as a result of the combination. The only goodwill that is recognized is any existing goodwill relating to either of the combining entities. Any difference between the consideration paid or transferred and the equity acquired is reflected within equity as other equity reserve, i.e., either contribution or distribution of equity.
- The consolidated statement of income reflects the results of the combining entities for the full year, irrespective of when the combination took place.

Goodwill

Goodwill arising from the acquisition of a subsidiary is recognized as an asset at the date the control is acquired (the acquisition date). Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously-held interest, if any, in the entity over the net fair value of the identifiable net assets recognized.

If after reassessment, the Group's interest in the net fair value of the acquiree's identifiable net assets exceeds the sum of consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously-held equity interest, if any, the excess is recognized immediately in the consolidated statement of income as a gain on bargain purchase.

After initial recognition, goodwill is measured at cost less accumulated impairment losses. Goodwill is not amortized, but is reviewed for impairment at least annually. Any impairment loss is recognized immediately in profit or loss and is not subsequently reversed.

On disposal of a subsidiary, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial years, except that the Group has adopted the following PFRSs and Philippine Accounting Standards (PAS) and Philippine Interpretations beginning January 1, 2021. The adoption of the new and amended standards and interpretations did not have any impact on the consolidated financial statements of the Group unless otherwise indicated.

- Amendment to PFRS 16, COVID-19-related Rent Concessions beyond 30 June 2021

The amendment provides relief to lessees from applying the PFRS 16 requirement on lease modifications to rent concessions arising as a direct consequence of the COVID-19 pandemic. A lessee may elect not to assess whether a rent concession from a lessor is a lease modification if it meets all of the following criteria:

- The rent concession is a direct consequence of COVID-19;
- The change in lease payments results in a revised lease consideration that is substantially the same as, or less than, the lease consideration immediately preceding the change;
- Any reduction in lease payments affects only payments originally due on or before June 30, 2022; and
- There is no substantive change to other terms and conditions of the lease.

A lessee that applies this practical expedient will account for any change in lease payments resulting from the COVID-19 related rent concession in the same way it would account for a change that is not a lease modification, i.e., as a variable lease payment.

The amendment is effective for annual reporting periods beginning on or after April 1, 2021. Early adoption is permitted.

The amendments had no impact on the consolidated financial statements of the Group.

- Amendments to PFRS 9, PAS 39, PFRS 7, PFRS 4 and PFRS 16, *Interest Rate Benchmark Reform – Phase 2*

The amendments provide the following temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR):

- Practical expedient for changes in the basis for determining the contractual cash flows as a result of IBOR reform
- Relief from discontinuing hedging relationships
- Relief from the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component

The Group shall also disclose information about:

- The nature and extent of risks to which the entity is exposed arising from financial instruments subject to IBOR reform, and how the entity manages those risks; and
- Their progress in completing the transition to alternative benchmark rates, and how the entity is managing that transition

The amendments had no impact on the consolidated financial statements of the Group.

Significant Accounting Policies

Current versus Noncurrent Classification

The Group presents assets and liabilities in the consolidated statement of financial position based on current or noncurrent classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in the normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalents, unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as noncurrent.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as noncurrent.

Deferred tax assets and liabilities are classified as noncurrent assets and liabilities.

Fair Value Measurement

The Group measures certain financial instruments and nonfinancial assets at fair value at each reporting date. Fair values of financial instruments measured at amortized cost and investment properties carried at cost are disclosed in Note 5.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting date.

Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from dates of placement, and that are subject to insignificant risk of changes in value.

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

a) Financial assets

Initial recognition and measurement

Financial assets are classified at fair value at initial recognition and subsequently measured at amortized cost, FVOCI, and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at FVTPL, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under PFRS 15.

In order for a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows which are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortized cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows. Financial assets classified and measured at FVOCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at FVTPL

The financial assets of the Group as of December 31, 2021 and 2020 consist of financial assets at amortized cost, financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments), derivative assets and financial assets at FVTPL (equity instruments).

Financial assets at amortized cost (debt instruments)

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost include cash and cash equivalents and receivables.

Financial assets designated at FVOCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at FVOCI when they meet the definition of equity under PAS 32, *Financial Instruments: Presentation*, and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as other income in the consolidated statements of income when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at FVOCI are not subject to impairment assessment.

The Group elected to classify irrevocably its investments in club shares under this category.

Financial assets at FVTPL

Debt instruments that do not meet the amortized cost criteria, or meets the criteria but the Group has designated as at FVTPL upon initial recognition, are classified as financial assets at FVTPL. Equity investments are classified as financial assets at FVTPL, unless the Group designates an equity investment that is not held for trading as at FVOCI at initial recognition.

A financial asset is considered as held for trading if:

- it has been acquired principally for the purpose of selling it in the near term;
- upon initial recognition, it is part of a portfolio of identified financial instruments that the Group manages together and has evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or financial guarantee.

Financial assets at FVTPL are carried in the consolidated statements of financial position at fair value with net changes in fair value recognized in the consolidated statements of income.

This category includes equity instruments which the Group had not irrevocably elected to classify at fair value through OCI and currency options.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired, or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

The Group recognizes an allowance for expected credit losses (ECLs) for all debt instruments not held at FVTPL. ECLs represent credit losses that reflect an unbiased and probability-weighted amount which is determined by evaluating a range of possible outcomes, the time value of money and reasonable and supportable information about past events, current conditions and forecasts of future economic conditions. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms. The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime ECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12-month ECL. The 12-month ECL is the portion of lifetime ECL that results from default events on a financial instrument that are possible within the 12 months after the reporting date. Lifetime ECL are credit losses that results from all possible default events over the expected life of a financial instrument.

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For other financial assets such as nontrade receivables, loans receivable, due from related parties and other receivables, ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk (SICR) since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For cash and cash equivalents and short-term investments, the Group applies the low credit risk simplification. The probability of default and loss given defaults are publicly available and are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group uses the ratings from reputable credit rating agencies to determine whether the debt instrument has SICR and to estimate ECLs.

The Group considers a debt investment security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

The key inputs in the model include the Group's definition of default and historical data of three years for the origination, maturity date and default date. The Group considers trade receivables and contract assets in default when contractual payment are 90 days past due, except for certain circumstances when the reason for being past due is due to reconciliation with customers of payment records which are administrative in nature which may extend the definition of default. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

Determining the stage for impairment

At each reporting date, the Group assesses whether there has been an SICR for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Group considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analyses.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed SICR since origination, then the loss allowance measurement reverts from lifetime ECL to 12-month ECL.

Staging assessment

PFRS 9 establishes a three-stage approach for impairment of financial assets, based on whether there has been a significant deterioration in the credit risk of a financial asset. These three stages then determine the amount of impairment to be recognized.

- Stage 1 is comprised of all non-impaired financial instruments which have not experienced a significant increase in credit risk since initial recognition. Entities are required to recognize 12-month ECL for stage 1 financial instruments. In assessing whether credit risk has increased significantly, entities are required to compare the risk of a default occurring on the financial instrument as at the reporting date, with the risk of a default occurring on the financial instrument as at the date of initial recognition.

- Stage 2 is comprised of all non-impaired financial instruments which have experienced a significant increase in credit risk since initial recognition. Entities are required to recognize lifetime ECL for stage 2 financial instruments. In subsequent reporting periods, if the credit risk of the financial instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then entities shall revert to recognizing 12-month ECL.
- Financial instruments are classified as stage 3 when there is objective evidence of impairment as a result of one or more loss events that have occurred after initial recognition with a negative impact on the estimated future cash flows of a financial instrument or a portfolio of financial instruments. The ECL model requires that lifetime ECL be recognized for financial assets that are in default. The Group considers a financial asset in default when contractual payments are 30-60 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows

b) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by PFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognized in the consolidated statements of income.

Financial liabilities designated upon initial recognition at FVTPL are designated at the initial date of recognition, and only if the criteria in PFRS 9 are satisfied.

The Group does not have financial liabilities at FVTPL as of December 31, 2021 and 2020.

Financial liabilities at amortized cost

This is the category most relevant to the Group. It pertains to financial liabilities that are not held for trading or not designated as at FVTPL upon the inception of the liability. These include liabilities arising from operations and borrowings.

After initial recognition, these financial liabilities are measured at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on the acquisition and fees or costs that are an integral part of the EIR. Gains and losses are recognized in profit or loss when the financial liabilities are derecognized, as well as through the EIR amortization process.

This category applies to the Group's accounts payable and accrued expenses (excluding advances from customers, advances from third parties, statutory and taxes payables), short-term debt, trust receipts payable and long-term debt.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in profit or loss.

c) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously. The Group assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of solvency or bankruptcy of the Group and all of the counterparties.

Inventories

Inventories, including goods-in-process, are recorded at cost and subsequently valued at the lower of cost and NRV. NRV is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

When the inventories are sold, the carrying amounts of those inventories are recognized under 'Cost of sales' in the consolidated statement of income in the period when the related revenue is recognized.

Costs incurred in bringing each product to its present location and conditions are accounted for as follows:

Finished goods, goods-in-process, raw materials, containers and packaging materials, and spare parts and supplies

Cost is determined using the weighted average method. The cost of raw materials, containers and packaging materials, and spare parts and supplies consist of their purchase cost. The cost of finished goods and goods-in-process include direct materials and labor, and a proportion of manufacturing overhead costs based on actual goods processed and produced, but excluding borrowing costs.

Materials in-transit

Cost is determined on a specific identification basis.

Biological Assets

The biological assets of the Group are divided into two major categories with sub-categories as follows:

- | | |
|-------------------|---|
| Swine livestock | <ul style="list-style-type: none">- Breeders (livestock bearer)- Sucklings (breeders' offspring)- Weanlings (comes from sucklings intended to be breeders or to be raised as fatteners/finishers)- Fatteners/finishers (comes from weanlings unfit to become breeders; intended for the production of meat and meat products or to be sold live) |
| Poultry livestock | <ul style="list-style-type: none">- Breeders (livestock bearer)- Chicks (breeders' offspring intended to be sold as breeders) |

Biological assets are measured on initial recognition and at each reporting date at its fair value less estimated costs to sell. The fair values are determined based on current market prices of livestock of similar age, breed and genetic merit. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market.

Agricultural produce is the harvested product of the Group's biological assets. A harvest occurs when agricultural produce is either detached from the bearer biological asset or when a biological asset's life processes cease. A gain or loss on initial recognition of agricultural produce at fair value less estimated costs to sell is recognized in the consolidated statement of income in the period in which it arises. The agricultural produce of swine livestock are hog carcasses, while the agricultural produce of poultry livestock are table eggs and hatched chick. These are then subsequently measured following PAS 2, *Inventories*.

A gain or loss on initial recognition of a biological asset at fair value less estimated costs to sell and from a change in fair value less estimated costs to sell of a biological asset are included in the consolidated statement of income in the period in which it arises.

Property, Plant and Equipment

Property, plant and equipment, except land, are carried at cost less accumulated depreciation and amortization and accumulated impairment losses, if any.

The initial cost of an item of property, plant and equipment comprises its purchase price and any cost attributable in bringing the asset to its intended location and working condition. Cost also includes:

- (a) interest and other financing charges on borrowed funds used to finance the acquisition of property, plant and equipment to the extent incurred during the period of installation and construction; and
- (b) asset retirement obligation relating to property, plant and equipment installed/constructed on leased properties, if any, representing the present value of the expected cost for the decommissioning of an asset after its use, and provided the recognition criteria for a provision are met.

Land is stated at cost less any impairment in value.

Subsequent costs are capitalized as part of the 'Property, plant and equipment' in the consolidated statement of financial position, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Cost of repairs and maintenance are expensed when incurred.

Foreign exchange differentials arising from foreign currency borrowings used for the acquisition of property, plant and equipment are capitalized to the extent that these are regarded as adjustments to interest costs.

Depreciation and amortization of property, plant and equipment commence once the property, plant and equipment are available for use and are computed using the straight-line method over the estimated useful life (EUL) of the assets regardless of utilization.

The EUL of property, plant and equipment of the Group follows:

	Years
Land improvements	5 to 10
Buildings and improvements	10 to 30
Machinery and equipment	10
Transportation equipment	5
Furniture, fixtures and equipment	5

Leasehold improvements are amortized over the shorter of their EUL or the corresponding lease terms. The residual values, useful lives and methods of depreciation and amortization of property, plant and equipment are reviewed periodically and adjusted, if appropriate, at each reporting date to ensure that the method and period of depreciation and amortization are consistent with the expected pattern of economic benefits from items of property, plant and equipment. Any change in the expected residual values, useful lives and methods of depreciation are adjusted prospectively from the time the change was determined necessary.

Construction-in-progress and equipment in transit are stated at cost, net of accumulated impairment losses, if any. This includes the cost of construction and other direct costs. Borrowing costs that are directly attributable to the construction of property, plant and equipment are capitalized during the construction period. Construction in-progress and equipment in transit are not depreciated until such time as the relevant assets are completed and put into operational use.

Construction in-progress and equipment in transit are transferred to the related 'Property, plant and equipment' in the consolidated statement of financial position when the construction or installation and related activities necessary to prepare the property, plant and equipment for their intended use are completed, and the property, plant and equipment are ready for service.

Major spare parts and stand-by equipment items that the Group expects to use over more than one period and can be used only in connection with an item of property, plant and equipment are accounted for as property, plant and equipment. Depreciation and amortization on these major spare parts and stand-by equipment commence once these have become available for use (i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by the Group).

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use or disposal of the asset. Any gain or loss arising from the derecognition of the property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated statement of income, in the period the item is derecognized.

Fully depreciated property, plant and equipment are retained in the accounts until these are no longer in use.

Investment Properties

Investment properties consist of properties that are held to earn rentals or for capital appreciation or both, and those which are not occupied by entities in the Group. Investment properties, except for land, are carried at cost less accumulated depreciation and any impairment loss, if any. Land is carried at cost less any accumulated impairment loss, if any. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met, and excludes the cost of day-to-day servicing of an investment property.

Investment properties are measured initially at cost, including transaction costs. Transaction costs represent nonrefundable taxes such as capital gains tax and documentary stamp tax that are for the account of the Group. An investment property acquired through an exchange transaction is measured at fair value of the asset acquired unless the fair value of such an asset cannot be measured, in which case, the investment property acquired is measured at the carrying amount of asset given up.

The Group's investment properties consist solely of buildings and building improvements and are depreciated using the straight-line method over their EUL ranging from 10 to 30 years (see Note 17).

The depreciation and amortization method and useful life are reviewed periodically to ensure that the method and period of depreciation and amortization are consistent with the expected pattern of economic useful benefits from items of investment properties.

Investment properties are derecognized when either they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. Any gains or losses on the retirement or disposal of investment properties are recognized in the consolidated statement of income in the year of retirement or disposal.

Transfers are made to (or from) investment property only when there is a change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

Goodwill

Goodwill represents the excess of the cost of the acquisition over the fair value of identifiable net assets of the investee at the date of acquisition which is not identifiable to specific assets.

Goodwill acquired in a business combination from the acquisition date is allocated to each of the Group's cash-generating units, or groups of cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Each unit or group of units to which the goodwill is allocated:

- represents the lowest level within the Group at which the goodwill is monitored for internal management purposes; and
- is not larger than a segment based on the Group's operating segments as determined in accordance with PFRS 8, *Operating Segments*.

Following initial recognition, goodwill is measured at cost, less any accumulated impairment losses, if any. Goodwill is reviewed for impairment annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired (see further discussion under Impairment of nonfinancial assets).

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Intangible Assets

Intangible assets (other than goodwill) acquired separately are measured on initial recognition at cost. The cost of intangible asset acquired in a business combination is its fair value at the acquisition date. Following initial recognition, intangible assets are measured at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The EUL of intangible assets are assessed to be either finite or indefinite.

The useful lives of intangible assets with a finite life are assessed at the individual asset level. Intangible assets with finite lives are amortized on a straight line basis over the asset's EUL and assessed for impairment, whenever there is an indication that the intangible assets may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each reporting date. Changes in the EUL or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with finite useful lives is recognized in the consolidated statement of income in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are tested for impairment annually, either individually or at the cash-generating unit level (see further discussion under Impairment of nonfinancial assets). Such intangibles are not amortized. The assessment of indefinite useful life is reviewed annually to determine whether the indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

An intangible asset is derecognized upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Gain or loss arising from derecognition of an intangible asset is measured as the difference between the net disposal proceeds and the carrying amount of the asset and is recognized in the consolidated statement of income when the asset is derecognized.

A summary of the policies applied to the Group's intangible assets follows:

	EUL	Amortization method used	Internally generated or acquired
Product formulation	Indefinite	No amortization	Acquired
Brands/Certain trademarks	Indefinite	No amortization	Acquired
Trademarks	Finite (4 years)	Straight line amortization	Acquired
Software costs	Finite (10 years)	Straight line amortization	Acquired
Customer relationship	Finite (35 years)	Straight line amortization	Acquired

Investment in Joint Ventures

The Group has interests in joint ventures. A joint venture is a contractual arrangement whereby two or more parties who have joint control over the arrangement have rights to the net assets of the arrangement.

The Group's investment in joint venture is accounted for using the equity method of accounting. Under the equity method, the investment in a joint venture is carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share in the net assets of the joint venture. The consolidated statement of income reflects the Group's share in the results of operations of the joint venture. Where there has been a change recognized directly in the investees' equity, the Group recognizes its share of any changes and discloses this, when applicable, in the other comprehensive income in the consolidated statement of changes in equity. Profits and losses arising from transactions between the Group and the joint ventures are eliminated to the extent of the interest in the joint ventures.

The Group discontinues applying the equity method when its investments in investee companies are reduced to zero. Accordingly, additional losses are not recognized unless the Group has guaranteed certain obligations of the associates or joint venture. When the investees subsequently report net income, the Group will resume applying the equity method but only after its equity in the net income equals the equity in net losses of associates and joint venture not recognized during the period the equity method was suspended.

The investee company's accounting policies conform to those used by the Group for like transactions and events in similar circumstances.

Impairment of Nonfinancial Assets

This accounting policy applies primarily to the Group's property, plant and equipment (see Note 13), right-of-use assets (see Note 37), investment properties (see Note 17), investments in joint ventures (see Note 16), goodwill and intangible assets (see Note 15).

Except for goodwill and intangible assets with indefinite useful lives which are tested for impairment annually, the Group assesses at each reporting date whether there is an indication that its nonfinancial assets may be impaired. When an indicator of impairment exists or when an annual impairment testing for an asset is required, the Group makes a formal estimate of recoverable amount. Recoverable amount is the higher of an asset's (or cash-generating unit's) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is assessed for the cash-generating unit to which the asset belongs. Where the carrying amount of an asset (or cash generating unit) exceeds its recoverable amount, the asset (or cash-generating unit) is considered impaired and is written-down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or cash-generating unit). In determining fair value less costs of disposal, recent market transactions are taken into account.

The Group bases its impairment calculation on most recent budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses are recognized under 'Provision for credit and impairment losses' in the consolidated statement of income.

The following criteria are also applied in assessing impairment of specific assets:

Property, plant and equipment, right-of-use assets, investment properties, intangible assets with definite useful lives, and investments in joint ventures

For property, plant and equipment, investment properties, intangible assets with definite useful lives, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated and an impairment assessment is performed. For investments in joint ventures, this impairment assessment is done after application of the equity method. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income. After such a reversal, the depreciation and amortization expense are adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Goodwill and intangible assets with indefinite useful lives

Goodwill is reviewed for impairment, annually or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (or group of cash-generating units) is less than the carrying amount to which goodwill has been allocated, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods.

Discontinued Operations

A disposal group qualifies as discontinued operation if it is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- represents a separate major line of business or geographical area of operations
- is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations, or
- is a subsidiary acquired exclusively with a view to resale.

The disposal group is excluded from the results of continuing operations and is presented as a single amount as 'Net income after tax from discontinued operations' in the consolidated statement of income.

Additional disclosures are provided in Note 33. All other notes to the consolidated financial statements include amounts of disposal group, unless otherwise mentioned.

Revenue Recognition

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has concluded that it is the principal in its revenue arrangements because it controls the goods or services before transferring them to the customer.

Sale of goods and services

Revenue from sale of goods and services is recognized at the point in time when control of the asset is transferred to the customer, generally on delivery of the goods and services. The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of goods and services, the Group considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer, if any. If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception using the expected value method and is constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved. Some contracts for the sale of goods and services provide customers with a right to return the goods within a specific period.

Sale of sugar and molasses

Sale of raw sugar is recognized upon (a) endorsement and transfer of quedans for quedan-based sales and (b) shipment or delivery and acceptance by the customers for physical sugar sales. Sale of refined sugar and alcohol is recognized upon shipment or delivery and acceptance by the customers. Sale of molasses is recognized upon (a) surrendering of molasses certificates (warehouse receipts for molasses) or (b) delivery and acceptance by the customer for physical molasses, whichever comes first.

Rendering of tolling services

Revenue derived from tolling activities is recognized as revenue over time as the related services are being rendered.

Revenue outside the scope of PFRS 15:

Dividend income

Dividend income is recognized when the shareholder's right to receive the payment is established.

Interest income

Interest income is recognized as it accrues using the EIR method under which interest income is recognized at the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

Provisions

Provisions are recognized when: (a) the Group has a present obligation (legal or constructive) as a

result of a past event; (b) it is probable (i.e., more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense under 'Finance cost' in the consolidated statement of income. Where the Group expects a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the consolidated statement of income, net of any reimbursement.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements but disclosed in the notes to the consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent assets are not recognized in the consolidated financial statements but disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Pension Costs

The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets, if any, adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Current service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss.

Past service costs are recognized in profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Group recognizes related restructuring costs.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset.

Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to consolidated statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

Termination benefit

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment as a result of either an entity's decision to terminate an employee's employment before the normal retirement date or an employee's decision to accept an offer of benefits in exchange for the termination of employment.

A liability and expense for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of those benefits and when the entity recognizes related restructuring costs. Initial recognition and subsequent changes to termination benefits are measured in accordance with the nature of the employee benefit, as either post-employment benefits, short-term employee benefits, or other long-term employee benefits.

Employee leave entitlement

Employee entitlements to annual leave are recognized as a liability when they are accrued to the employees. The undiscounted liability for leave expected to be settled wholly before twelve months after the end of the annual reporting period is recognized for services rendered by employees up to the end of the reporting period.

Income Taxes

Current tax

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in countries where the Group operates and generates taxable income.

Deferred tax

Deferred tax is provided using the balance sheet liability method on all temporary differences, with certain exceptions, at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits from unused minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, and the carryforward benefits of unused tax credits from excess MCIT and unused NOLCO can be utilized, except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor future taxable profit or loss; and
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and future taxable profit will be available against which the temporary differences can be utilized.

The carrying amounts of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date, and are recognized to the extent that it has become probable that future taxable income will allow the deferred tax assets to be recognized.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss in the consolidated statement of comprehensive income. Such deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT)

Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sale of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the consolidated statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sale of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated statement of financial position to the extent of the recoverable amount.

The net amount of VAT recoverable from, or payable to, the taxation authority by each entity is included as part of 'Other current assets' or 'Accounts payable and other accrued liabilities' in the consolidated statement of financial position.

Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Leases

The Group assesses whether a contract is, or contains a lease, at the inception of a contract. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-of-use (ROU) assets representing the right to use the underlying assets.

Right-of-use assets

The Group recognizes ROU assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). ROU assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of ROU assets includes the amount of lease liabilities recognized, initial direct costs incurred, lease payments made at or before the commencement date less any lease incentives received, and any estimated costs to be incurred in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories. Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized ROU assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. ROU assets, which are presented under 'Noncurrent Assets' in the consolidated statement of financial position, are subject to impairment.

The depreciation period for each class of ROU assets follows:

	Period
Land and land improvements	10 years
Buildings and improvements	2-20 years
Machinery and equipment	2 years
Transportation equipment	2 years
Furniture and fixture	2 years

Lease liabilities

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflected the Group exercising the option to terminate. Variable lease payments that do not depend on an index

or a rate are recognized as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the commencement date if the interest rate implicit to the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Short-term leases

The Group applies the short-term lease recognition exemption to its short-term leases of 12 months or less from the commencement date and do not contain a purchase option. Lease payments on short-term leases are recognized as expense on a straight-line basis over the lease term.

Group as a lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the assets are classified as operating leases. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as the rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Rent income

Rent income arising from investment properties is accounted for on a straight-line basis over the lease term on ongoing leases and is included in other loss in the consolidated statement of income.

Cost and Expenses

Cost and expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Cost and expenses are recognized when incurred.

Foreign Currency Translation/Transactions

The functional and presentation currency of the Parent Company and its Philippine subsidiaries is the Philippine Peso. Each entity in the Group determines its own functional currency and items included in the consolidated financial statements of each entity are measured using that functional currency.

Transactions and balances

Transactions in foreign currencies are initially recorded in the functional currency rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange prevailing at the reporting date. Differences arising from settlement or translation of monetary items are recognized in the consolidated statement of income. Tax charges and credits attributable to exchange differences are also dealt with in statement of income. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of initial transaction. Nonmonetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gain or loss arising from translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item.

Group companies

As of reporting date, the assets and liabilities of the subsidiaries are translated into the presentation currency of the Group at the rate of exchange prevailing at reporting date and their respective statements of income are translated at the weighted average exchange rates for the year. The exchange differences arising from the translation are taken directly to a separate component of equity as 'Cumulative translation adjustments' under 'Other comprehensive income'. On disposal of a foreign entity, the deferred cumulative amount recognized in equity relating to that particular foreign operation shall be recognized in the consolidated statement of income.

The Group has determined that the cumulative translation adjustments will not be realized in the foreseeable future. Therefore, the Group does not recognize deferred tax liabilities on its cumulative translation adjustments.

Common Stock

Capital stocks are classified as equity and are recorded at par. Proceeds in excess of par value are recorded as 'Additional paid-in capital' in the consolidated statement of changes in equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Retained Earnings

Retained earnings represent the cumulative balance of periodic net income (loss), dividend distributions, prior period adjustments and effect of changes in accounting policy and capital adjustments.

Other Comprehensive Income

Other comprehensive income comprises items of income and expenses (including items previously presented under the consolidated statements of changes in equity) that are not recognized in the consolidated statement of income for the year in accordance with PFRSs.

Treasury Shares

Treasury shares are recorded at cost and are presented as a deduction from equity. Any consideration paid or received in connection with treasury shares are recognized directly in equity.

When the shares are retired, the capital stock account is reduced by its par value. The excess of cost over par value upon retirement is debited to the following accounts in the order given: (a) additional paid-in capital to the extent of the specific or average additional paid-in capital when the shares were issued, and (b) retained earnings. When shares are sold, the treasury share account is credited and reduced by the weighted average cost of the shares sold. The excess of any consideration over the cost is credited to additional paid-in capital.

Transaction costs incurred such as registration and other regulatory fees, amounts paid to legal, accounting and other professional advisers, printing costs and stamp duties (net of any related income tax benefit) in relation to issuing or acquiring the treasury shares are accounted for as reduction from equity, which is disclosed separately.

No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Equity Reserves

Equity reserves arise from transactions in which the proportion of equity held by non-controlling interests changes. These are initially measured as the difference between the amount by which the non-controlling interests were adjusted and the fair value of the consideration paid or received. Equity reserves are attributed to the owners of the Parent Company.

Dividends on Common Stocks

Dividends on common shares are recognized as a liability and deducted from equity when approved by BOD of the Parent Company in the case of cash dividends, and the BOD and shareholders of the Parent Company in the case of stock dividends.

Earnings Per Share (EPS)

Basic EPS is computed by dividing consolidated net income attributable to equity holders of the Parent Company (consolidated net income less dividends on preferred shares) by the weighted average number of common stocks issued and outstanding during the year, adjusted for any subsequent stock dividends declared.

Diluted EPS amounts are calculated by dividing the consolidated net income attributable to equity holders of the Parent Company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

Segment Reporting

The Group's operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. Financial information on business segments is presented in Note 6 to the consolidated financial statements.

Events after Reporting Date

Any post year-end event up to the date of approval of the BOD of the consolidated financial statements that provides additional information about the Group's position at reporting date (adjusting event) is reflected in the consolidated financial statements. Any post year-end event that is not an adjusting event is disclosed in the notes to the consolidated financial statements, when material.

Standards Issued but not yet Effective

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements will have a significant impact on its consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

Effective beginning on or after January 1, 2022

- Amendments to PFRS 3, *Reference to the Conceptual Framework*

The amendments are intended to replace a reference to the Framework for the Preparation and Presentation of Financial Statements, issued in 1989, with a reference to the Conceptual Framework for Financial Reporting issued in March 2018 without significantly changing its requirements. The amendments added an exception to the recognition principle of PFRS 3, *Business Combinations* to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of PAS 37, *Provisions, Contingent Liabilities and Contingent Assets* or Philippine-IFRIC 21, *Levies*, if incurred separately. At the same time, the amendments add a new paragraph to PFRS 3 to clarify that contingent assets do not qualify for recognition at the acquisition date.

The amendments are effective for annual reporting periods beginning on or after January 1, 2022 and apply prospectively.

- Amendments to PAS 16, *Plant and Equipment: Proceeds before Intended Use*

The amendments prohibit entities deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognizes the proceeds from selling such items, and the costs of producing those items, in profit or loss.

The amendment is effective for annual reporting periods beginning on or after January 1, 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

The amendments are not expected to have a material impact on the Group.

- Amendments to PAS 37, *Onerous Contracts – Costs of Fulfilling a Contract*

The amendments specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making. The amendments apply a “directly related cost approach”. The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities. General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

The amendments are effective for annual reporting periods beginning on or after January 1, 2022. The Group will apply these amendments to contracts for which it has not yet fulfilled all its obligations at the beginning of the annual reporting period in which it first applies the amendments.

- *Annual Improvements to PFRSs 2018-2020 Cycle*

- Amendments to PFRS 1, *First-time Adoption of Philippines Financial Reporting Standards, Subsidiary as a first-time adopter*

The amendment permits a subsidiary that elects to apply paragraph D16(a) of PFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent’s date of transition to PFRS. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of PFRS 1.

The amendment is effective for annual reporting periods beginning on or after January 1, 2022 with earlier adoption permitted. The amendments are not expected to have a material impact on the Group.

- Amendments to PFRS 9, *Financial Instruments, Fees in the '10 per cent' test for derecognition of financial liabilities*

The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

The amendment is effective for annual reporting periods beginning on or after January 1, 2022 with earlier adoption permitted. The Group will apply the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment. The amendments are not expected to have a material impact on the Group.

- Amendments to PAS 41, *Agriculture, Taxation in fair value measurements*

The amendment removes the requirement in paragraph 22 of PAS 41 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of PAS 41.

An entity applies the amendment prospectively to fair value measurements on or after the beginning of the first annual reporting period beginning on or after January 1, 2022 with earlier adoption permitted. The amendments are not expected to have a material impact on the Group.

Effective beginning on or after January 1, 2023

- Amendments to PAS 12, *Deferred Tax related to Assets and Liabilities arising from a Single Transaction*

The amendments narrow the scope of the initial recognition exception under PAS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences.

The amendments also clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement (having considered the applicable tax law) whether such deductions are attributable for tax purposes to the liability recognized in the financial statements (and interest expense) or to the related asset component (and interest expense).

An entity applies the amendments to transactions that occur on or after the beginning of the earliest comparative period presented for annual reporting periods on or after January 1, 2023. The amendments are not expected to have a material impact on the Group.

- Amendments to PAS 8, *Definition of Accounting Estimates*

The amendments introduce a new definition of accounting estimates and clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, the amendments clarify that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior period errors.

An entity applies the amendments to changes in accounting policies and changes in accounting estimates that occur on or after January 1, 2023 with earlier adoption permitted. The amendments are not expected to have a material impact on the Group.

- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure of Accounting Policies*

The amendments provide guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by:

- Replacing the requirement for entities to disclose their ‘significant’ accounting policies with a requirement to disclose their ‘material’ accounting policies, and
- Adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures

The amendments to the Practice Statement provide non-mandatory guidance. Meanwhile, the amendments to PAS 1 are effective for annual periods beginning on or after January 1, 2023. Early application is permitted as long as this fact is disclosed. The amendments are not expected to have a material impact on the Group.

Effective beginning on or after January 1, 2024

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*

The amendments clarify paragraphs 69 to 76 of PAS 1, *Presentation of Financial Statements*, to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

The amendments are effective for annual reporting periods beginning on or after January 1, 2023 and must be applied retrospectively. However, in November 2021, the International Accounting Standards Board (IASB) tentatively decided to defer the effective date to no earlier than January 1, 2024. The Group is currently assessing the impact the amendments will have on current practice and whether existing loan agreements may require renegotiation.

Effective beginning on or after January 1, 2025

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

On December 15, 2021, the FRSC amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter No. 2020-62 issued by the Insurance Commission which deferred the implementation of PFRS 17 by two (2) years after its effective date as decided by the IASB.

PFRS 17 is effective for reporting periods beginning on or after January 1, 2025, with comparative figures required. Early application is permitted. The amendments are not expected to have a material impact on the Group.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the IASB completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

The amendments are not expected to have a material impact on the Group.

3. Significant Accounting Judgments and Estimates

The preparation of the consolidated financial statements in compliance with PFRSs requires the Group to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the consolidated financial statements as they become reasonably determinable.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

a. Revenue recognition on sale of goods and services

Revenue recognition under PFRS 15 involves the application of significant judgment and estimation in the: (a) identification of the contract for sale of goods that would meet the requirements of PFRS 15; (b) assessment of performance obligation and the probability that the Group will collect the consideration from the buyer; (c) determining method to estimate variable consideration and assessing the constraint; and (d) recognition of revenue as the Group satisfies the performance obligation.

i. Existence of a contract

The Group enters into a contract with customer through an approved purchase order which constitutes a valid contract as specific details such as the quantity, price, contract terms and their respective obligations are clearly identified. In the case of sales to key accounts and distributors, the combined approved purchase order and trading terms agreement/exclusive distributorship agreement constitute a valid contract.

ii. Identifying performance obligation

The Group identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Group's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract.

Based on management assessment, other than the sale of goods and services, no other performance obligations were identified except in the case of milling revenue.

iii. Recognition of revenue as the Group satisfies the performance obligation

The Group recognizes its revenue for all revenue streams at a point in time, when the goods are sold and delivered and as services are being rendered. In addition, part of the assessment process of the Group before revenue recognition is to assess the probability that the Group will collect the consideration to which it will be entitled in exchange for the goods sold that will be transferred to the customer.

iv. *Method to estimate variable consideration and assess constraint*

The Group uses historical experience with key accounts and distributors from the past 12 months to determine the expected value of rights of return and constrain the consideration under the contract accordingly.

v. *Recognition of milling revenue under output sharing agreement and cane purchase agreement*

The Group applies both output sharing agreement and cane purchase agreement in relation to milling operations. Under output sharing agreement, milling revenue is recognized based on the fair value of the millshare at average raw sugar selling price on the month with sugar production after considering in-purchase, which represents cane purchase agreement. Under cane purchase agreement, the Group purchases raw sugar from the traders and/or planters. The in-purchase rate is derived by determining the total raw sugar purchases and the total planters' share. Raw production costs are allocated systematically based on the output sharing and cane purchase agreement rates.

b. *Contingencies*

The Group is currently involved in various legal proceedings. The estimate of the probable costs for the resolution of these claims has been developed in consultation with outside counsel handling the defense in these matters and is based upon an analysis of potential results. The Group currently does not believe these proceedings will have a material effect on the Group's consolidated financial position. It is possible, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

c. *Determining whether it is reasonably certain that a renewal and termination option will be exercised - the Group as a lessee*

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to renew the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has several lease contracts that include renewal and termination options. The Group applies judgment in evaluating whether it is reasonably certain to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew or terminate (e.g., a change in business strategy).

The Group included the renewal period as part of the lease term for leases, together with any periods covered by an option to renew the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

d. *Assessment of elements of a business*

The Group determined that its acquisition of properties in La Carlota City should be accounted for as a purchase of assets. The Group considered the terms and conditions of the asset purchase agreement and other related agreements, and assessed that the properties acquired do not meet the elements of a business because:

- (i) there were no outputs as of acquisition date;
- (ii) the inputs acquired do not include an organized workforce; and

- (iii) no substantive processes were acquired either as part of the terms of the agreements or through the intellectual capacity of any organized workforce.

e. Discontinued operations

The Group determined that the sale of the Oceania businesses will qualify for presentation as discontinued operations since it represents a separate line of business for which the operations and cash flows can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the Group (Note 33).

Estimates

The key assumptions concerning the future and other sources of estimation uncertainty at the financial position date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

a. Assessment for ECL on trade receivables

The Group, applying the simplified approach in the computation of ECL, initially uses a provision matrix based on historical default rates for trade receivables. The provision matrix specifies provision rates depending on the number of days that a trade receivable is past due. The Group also uses appropriate groupings if its historical credit loss experience shows significantly different loss patterns for different customer segments. The Group then adjusts the historical credit loss experience with forward-looking information on the basis of current observable data affecting each customer segment to reflect the effects of current and forecasted economic conditions.

The Group adjusts historical default rates to forward-looking default rate by determining the closely related economic factor affecting each customer segment. The Group regularly reviews the methodology and assumptions used for estimating ECL to reduce any differences between estimates and actual credit loss experience.

The determination of the relationship between historical default rates and forecasted economic conditions is a significant accounting estimate. Accordingly, the provision for ECL on trade receivables is sensitive to changes in assumptions about forecasted economic conditions.

The Group has assessed that the ECLs on trade receivables is not material because significant amount of its receivables are normally collected within one year. The carrying amount of trade receivables is ₱12.9 billion and ₱13.7 billion as at December 31, 2021 and 2020, respectively (see Note 10).

b. Assessment for ECL on Other Financial Assets at Amortized Cost

The Group determines the allowance for ECL using general approach based on the probability-weighted estimate of the present value of all cash shortfalls over the expected life of other financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12 months unless there has been an SICR since initial recognition in which case lifetime ECLs are provided.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;

- Existing or forecasted adverse changes in business, financial or economic conditions; and,
- Actual or expected significant adverse changes in the operating results of the borrower.

The Group also considers financial assets that are more than 90 days past due to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent an SICR such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the borrower.

The Group has assessed that the ECL on other financial assets at amortized cost is not material because the transactions with respect to these financial assets were entered into by the Group only with reputable banks and companies with good credit standing and relatively low risk of defaults. Accordingly, no provision for ECL on other financial assets at amortized cost was recognized in 2021 and 2020.

c. Determination of fair values less estimated costs to sell of biological assets

The fair values of biological assets are determined based on current market prices of livestock of similar age, breed and genetic merit. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market. The fair values are reviewed and updated if expectations differ from previous estimates due to changes brought by both physical change and price changes in the market. It is possible that future results of operations could be materially affected by changes in these estimates brought about by the changes in factors mentioned.

As of December 31, 2021 and 2020, the Group's biological assets carried at fair values less estimated costs to sell amounted to ₱298.3 million and ₱234.3 million, respectively (see Note 14). For the years ended December 31, 2021, 2020 and 2019, the Group recognized changes in the fair value less costs to sell of biological assets amounting to ₱2.6 million gain, ₱37.0 million gain, and ₱70.2 million loss, respectively (see Note 14). Changes in fair value of biological assets are recognized in the consolidated statements of income.

d. Impairment of goodwill and intangible assets with indefinite useful lives

The Group performed its annual impairment test on its goodwill and other intangible assets with indefinite useful lives as of reporting date. The recoverable amounts of the intangible assets were determined based on value in use calculations using cash flow projections from financial budgets approved by management covering a five-year period.

The following assumptions were also used in computing value in use:

Growth rate estimates - growth rates include revenue growth and terminal growth rates that are based on experiences and strategies developed for the various subsidiaries. The prospect for the industry was also considered in estimating the growth rates.

Discount rates - discount rates were estimated based on the industry weighted average cost of capital, which includes the cost of equity and debt after considering the gearing ratio.

Value-in-use is most sensitive to changes in discount rate and growth rate.

As of December 31, 2021 and 2020, the balance of the Group's goodwill and intangible assets with indefinite useful lives and accumulated impairment losses follow:

	2021	2020
Goodwill (Note 15)	₱21,271,723,229	₱31,194,495,817
Intangible assets (Note 15)	1,820,637,714	11,599,843,220

e. Assessment of impairment of nonfinancial assets

The Group assesses the impairment of its nonfinancial assets (i.e., property, plant and equipment, right-of-use assets, investment properties, investments in joint venture and intangible assets with finite useful lives) whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The factors that the Group considers important which could trigger an impairment review include the following:

- Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating the asset's value in use and decrease the asset's recoverable amount materially;
- Significant underperformance relative to expected historical or projected future operating results;
- Significant changes in the manner of use of the acquired assets or the strategy for overall business such as plans to discontinue or restructure the operation to which an asset belongs; and
- Significant negative industry or economic trends.

The Group determines an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from recent, binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset base of the cash-generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash inflows and the growth rate used for extrapolation purposes.

For the year ended December 31, 2021, the Group recognized impairment losses on its property, plant and equipment amounting to ₱432.6 million. For the years ended December 31, 2020 and 2019, no impairment loss was recognized (see Note 13).

For the years ended December 31, 2021, 2020 and 2019, the Group did not recognize any impairment losses on its right-of-use assets (see Note 37), investment properties (see Note 17), goodwill and its other intangible assets (see Note 15).

As of December 31, 2021 and 2020, the balances of the Group's nonfinancial assets with finite useful lives, excluding biological assets, net of accumulated depreciation, amortization and impairment losses follow:

	2021	2020
Property, plant and equipment (Note 13)	₱55,881,358,761	₱58,989,613,043
Right-of-use assets (Note 37)	2,215,167,047	6,015,980,376
Intangible assets (Note 15)	–	1,811,906,549
Investments in joint ventures (Note 16)	55,228,221	386,494,519
Investment properties (Note 17)	26,750,788	29,962,148

f. Determination of the fair value of intangible assets and property, plant and equipment acquired in a business combination

The Group measures the identifiable assets and liabilities acquired in a business combination at fair value at the date of acquisition.

The fair value of the intangible assets acquired in a business combination is determined based on the net sales forecast attributable to the intangible assets, growth rate estimates and royalty rates using comparable license agreements. Royalty rates are based on the estimated arm's length royalty rate that would be paid for the use of the intangible assets. Growth rate estimate includes long-term growth rate and terminal growth rate applied to future cash flows beyond the projection period.

The fair value of property, plant and equipment acquired in a business combination is determined based on comparable properties after adjustments for various factors such as location, size and shape of the property (see Note 13). Cost information and current prices of comparable equipment are also utilized to determine the fair value of equipment.

g. Estimation of pension and other benefits costs

The determination of the obligation and cost of pension and other employee benefits is dependent on the selection of certain assumptions used in calculating such amounts. Those assumptions include, among others, discount rates and salary increase rates (see Note 31). Actual results that differ from the Group's assumptions are accumulated and amortized over future periods and therefore, generally affect the recognized expense and recorded obligation in such future periods.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of Philippine government bonds with terms consistent with the expected employee benefit payout as of reporting date.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future salary increase rates of the Group.

As of December 31, 2021 and 2020, the balance of the Group's present value of defined benefit obligations and other benefits is shown in Note 31 to the consolidated financial statements.

h. Recognition of deferred income tax assets

The Group reviews the carrying amounts of its deferred income taxes at each reporting date and reduces the deferred tax assets to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized. However, there is no guarantee that the Group will generate sufficient taxable income to allow all or part of the deferred tax assets to be utilized. As of December 31, 2021 and 2020, the Group recognized

net deferred tax assets amounting to ₱447.5 million and ₱555.1 million, respectively (see Note 32), as the Group believes sufficient taxable income will allow these deferred tax assets to be utilized.

Net deferred tax liabilities amounted to ₱1.2 billion and ₱3.8 billion as of December 31, 2021 and 2020, respectively (see Note 32).

The recognized and unrecognized deferred tax assets for the Group are disclosed in Note 32.

i. Valuation of ROU assets and lease liabilities

The application of PFRS 16 requires the Group to make assumptions that affect the valuation of its ROU assets and lease liabilities. These include determining the length of the lease term and determining the interest rate to be used for discounting future cash flows.

Lease term. The lease term determined by the Group comprises non-cancellable period of lease contracts, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

Discount rate. The Company cannot readily determine the interest rate implicit in the lease, therefore it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is determined using risk-free rates applicable for currency of the lease contract and for similar tenor, corrected by the average credit spread of entities with rating similar to the Group's rating, observed in the period when the lease contract commences or is modified.

j. COVID-19 Pandemic

The COVID-19 pandemic did not have a significant impact on the Group's business operations. The operations in the Philippines and other areas around the world remain fully operational with no major disruptions recorded to date.

To ensure ongoing impacts of COVID-19 have been appropriately reflected in the Group's consolidated financial statements, the Group has assessed the impact of COVID-19 as follows:

- Collectability of accounts with customers continues to be closely monitored. A material change in the provision for impairment of trade receivables has not been identified.
- The cash flow projections used in the impairment testing for goodwill and intangible assets with indefinite lives include the Group's best estimates of any potential future impact from the COVID-19 pandemic.
- The market data used by the Group in other estimates (such as market risk, risk free borrowing rates, and data of comparable companies) are the latest available data, which already include the economic effects of the pandemic
- The Group has also considered the increase uncertainty in determining key assumptions within the assessment of future taxable income of the entities of the Group upon which recognition of the deferred tax assets is assessed, including forecast of revenue and expenses, among others.

The Group continues to monitor the risks and the ongoing impacts of COVID-19 on its business.

4. Financial Risk Management Objectives and Policies

The Group's principal financial instruments, other than derivative financial instruments, comprise cash and cash equivalents, financial assets at FVTPL, financial assets at FVOCI, and interest-bearing loans and other borrowings. The main purpose of these financial instruments is to finance the Group's operations and related capital expenditures. The Group has various other financial assets and financial liabilities, such as trade receivables and payables which arise directly from its operations. One of the Group's subsidiaries is a counterparty to derivative contracts. These derivatives are entered into as a means of reducing or managing their respective foreign exchange exposures.

The BOD of the Parent Company and its subsidiaries review and approve policies for managing each of these risks and they are summarized below, together with the related risk management structure.

Risk Management Structure

The Group's risk management structure is closely aligned with that of the Ultimate Parent Company. The BOD of the Parent Company and the respective BODs of each subsidiary are ultimately responsible for the oversight of the Group's risk management processes that involve identifying, measuring, analyzing, monitoring and controlling risks.

The risk management framework encompasses environmental scanning, the identification and assessment of business risks, development of risk management strategies, design and implementation of risk management capabilities and appropriate responses, monitoring of risks and risk management performance, and identification of areas and opportunities for improvement in the risk management process.

The BOD has created the board-level Board Risk and Oversight Committee (BROC) to spearhead the managing and monitoring of risks.

BROC

The purpose of the Board Risk Oversight Committee is to oversee the establishment of an Enterprise Risk Management (ERM) framework that will effectively identify, monitor, assess and manage key business risks. The risk management framework shall guide the Board in identifying units/business lines and enterprise-level risk exposures, as well as the effectiveness of risk management strategies. The Committee shall be responsible for defining the Group's level of risk tolerance and providing oversight over its risk management policies and procedures to anticipate, minimize, control or manage risks or possible threats to its operational and financial viability.

Corporate Governance Compliance Officer

Compliance with the principles of good corporate governance is also one of the primary objectives of the BOD. To assist the BOD in achieving this purpose, the BOD has designated a Compliance Officer who shall be responsible for:

- Monitoring, reviewing, evaluating and ensuring the compliance by the Group, its Officers and Directors with the provisions and requirements of the Corporate Governance Manual and the relevant laws, the Code of Corporate Governance, rules, regulations and all governance issuances of regulatory agencies; and
- Assisting the Board and the Corporate Governance Committee in the performance of their governance functions, including their duties to oversee the formulation or review and implementation of the Corporate Governance structure and policies of the Group, and to assist in the conduct of self-assessment of the performance and effectiveness of the Board, the Board Committees and individual Board members in carrying out their functions as set out in the Corporate Governance Manual and the respective charters of the Board Committees.

Enterprise Resource Management (ERM) Framework

The ERM framework revolves around the following activities:

1. **Risk Identification.** This involves the identification of key business drivers that influence the operability and performance of the business units. Each business driver is assigned strategic and operational objectives that are owned by risk champions and risk owners. Each risk champion and owner conduct their risk identification process using different tools such as risk factor analysis, megatrends analysis, and systems dynamics analysis.
2. **Risk Assessment.** Each identified risk is assessed to determine if they pose significant impact to the business unit's ability to implement strategy and deliver business objectives. This process involves grouping similar risks into categories such as Reputational Risk, Strategic Risk, Financial Risk, Compliance Risk, Operations Risk, and Emerging Risk. For each risk category, a risk assessment scale provides an objective criterion to evaluate the impact to the business - insignificant, minor, moderate, major, or extreme impact. The impact severity of the risk is rated based on their nature, regardless of the organization's circumstances and capability to manage them.
3. **Risk Prioritization.** This process enables the organization to focus the implementation of risk responses into certain high and medium severity risks based on the organization's risk profile.
4. **Risk Response, Monitoring, and Evaluation.** Appropriate risk responses are put in place for each priority risk, both at the level of the risk champions and risk owners and at the enterprise and Group level. Risk champions continually monitor and evaluate the effectiveness of the risk responses. Material residual risks are assessed for improvement of risk response and identification of recovery measures.
5. **Risk Reporting.** At the Group level, top risks are reviewed, updated and reported to the Board Risk Oversight Committee twice a year.

Risk Management Policies

The main risks arising from the use of financial instruments are credit risk, liquidity risk and market risks such as foreign currency risk, equity price risk and interest rate risk. The Group's policies for managing the aforementioned risks are summarized below.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Group trades only with recognized and creditworthy third parties. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. The Credit Management Division (CMD) of the Group continuously provides credit notification and implements various credit actions, depending on assessed risks, to minimize credit exposure. Receivable balances of trade customers are being monitored on a regular basis and appropriate credit treatments are executed for overdue accounts. Generally, trade receivables are written off when deemed unrecoverable. Likewise, other receivable balances are also being monitored and subjected to appropriate actions to manage credit risk.

With respect to credit risk arising from the other financial assets of the Group, which comprise cash and cash equivalents, the Group's exposure to credit risk arises from default of the counterparty with a maximum exposure equal to the carrying amount of these instruments.

a. Credit risk exposure

With respect to credit risk arising from financial assets of the Group, which comprise cash and cash equivalents and receivables, the Group's maximum exposure to credit risk is equal to its carrying amount as of December 31, 2021 and 2020, except for the Group's trade receivables as of December 31, 2021 and 2020 with carrying value of ₱12.9 billion and ₱13.7 billion,

respectively, and collateral with fair value amounting to ₱2.7 billion and ₱2.3 billion as of December 31, 2021 and 2020, respectively, resulting to net exposure of ₱10.2 billion and ₱11.4 billion, respectively.

The collateral securities related to the Group's trade receivables consist of standby letters of credit. The Group holds no other collateral or guarantee that would reduce the maximum exposure to credit risk.

b. Risk concentrations of the maximum exposure to credit risk

Concentrations arise when a number of counterparties are engaged in similar business activities or activities in the same geographic region or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location. Such credit risk concentrations, if not properly managed, may cause significant losses that could threaten the Group's financial strength and undermine public confidence.

In order to avoid excessive concentrations of risk, identified concentrations of credit risks are controlled and managed in accordance with the Group's policies and procedures.

i. Concentration by geographical location

The Group's credit risk exposures as of December 31, 2021 and 2020 before taking into account any collateral held or other credit enhancements are categorized by geographic location follow:

High grade cash and cash equivalents are short-term placements and working cash fund placed, invested, or deposited in foreign and local banks belonging to the top ten (10) banks, including an affiliated bank, in the Philippines in terms of resources and profitability.

Other high-grade accounts are accounts considered to be high value. The counterparties have a very remote likelihood of default and have consistently exhibited good paying habits.

Standard grade accounts are active accounts with minimal to regular instances of payment default, due to ordinary/common collection issues. These accounts are typically not impaired as the counterparties generally respond to credit actions and update their payments accordingly.

Substandard grade accounts are accounts which have probability of impairment based on historical trend. These accounts show propensity to default in payment despite regular follow-up actions and extended payment terms.

Liquidity risk

Liquidity risk is the risk of not being able to meet funding obligation such as the repayment of liabilities or payment of asset purchases as they fall due. The Group's liquidity management involves maintaining funding capacity to finance capital expenditures and service maturing debts, and to accommodate any fluctuations in asset and liability levels due to changes in the Group's business operations or unanticipated events created by customer behavior or capital and financial market

conditions. The Group maintains a level of cash and cash equivalents deemed sufficient to finance its operations. It also maintains a portfolio of highly marketable and diverse financial assets that assumed to be easily liquidated in the event of an unforeseen interruption of cash flow. The Group also has committed lines of credit that it can access to meet liquidity needs. As part of its liquidity risk management, the Group regularly evaluates its projected and actual cash flows. It also continuously assesses conditions in the financial markets for opportunities to pursue fund raising activities. Fund raising activities may include obtaining bank loans and capital market issues both onshore and offshore.

Maturity Profile of Financial Liabilities

The tables below summarize the maturity profile of the Group's financial liabilities as of December 31, 2021 and 2020 based on the remaining undiscounted contractual cash flows.

Market risk

Market risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The three types of market risk are interest rate risk, foreign currency exchange risk and equity price risk.

Foreign currency risk

Foreign currency risk arises on financial instruments that are denominated in a foreign currency other than the functional currency in which they are measured.

The Group has transactional currency exposures. Such exposures arise from sales and purchases in currencies other than the entities' functional currency. For the years ended December 31, 2021, 2020, and 2019, approximately 19.0%, 18.8%, and 20.8% of the Group's total sales, respectively, are denominated in currencies other than the functional currency. In addition, 3.0% and 1.8% of the Group's debts are denominated in various currencies as of December 31, 2021 and 2020, respectively.

The Group estimates a reasonably possible change of +5.00 in the US Dollar to Philippine Peso exchange rate would have an impact of approximately ₱57.8 million and ₱241.3 million on income before income tax, and equity for the years ended December 31, 2021 and 2020, respectively. An equal change in the opposite direction would have decreased income before income tax by the same amount.

The impact of the range of reasonably possible changes in the exchange rates of the other currencies against the Philippine Peso on the Group's income before income tax as of December 31, 2021 and 2020 are not significant.

The exchange rates used to restate the US dollar-denominated financial assets and liabilities were ₱51.00 to US\$1.00 and ₱48.02 to US\$1.00 as of December 31, 2021 and 2020, respectively.

Equity price risk

Equity price risk is the risk that the fair values of equities will change as a result of changes in the levels of equity indices and the value of individual stocks.

The table below shows the effect on equity as a result of a change in the fair value of equity instruments held as financial assets at FVTPL investments due to reasonably possible changes in equity indices:

	2021		2020	
Changes in PSEi	18.59%	-18.59%	33.14%	(33.14%)
Change in trading gain (loss) at equity portfolio	64,004,462	(64,004,462)	134,257,159	(134,257,159)
As a percentage of the Parent Company's trading gain for the year	(136.23%)	136.23%	(8.67%)	8.67%

The Group's investment in golf shares designated as financial assets at FVOCI are susceptible to market price risk arising from uncertainties about future values of the investment security. The Group estimates an increase of 1.00% would have an impact of approximately ₱0.8 million on equity for the year ended December 31, 2021 and 2020. An equal change in the opposite direction would have decreased equity by the same amount.

Interest rate risk

The Group's exposure to market risk for changes in interest rates relates primarily to the subsidiaries' long-term debt obligations which are subject to floating rate. The Group's policy is to manage its interest cost using a mix of fixed and variable rate debt.

The following table show information about the Group's financial instruments that are exposed to interest rate risk and presented by maturity profile:

	2020						Total	Total (in Philippine Peso)	Debt Issuance Costs (in Philippine Peso)	Carrying Value (in Philippine Peso)
	<1 year	>1-<2 years	>2-<3 years	>3-<4 years	>4-<5 years	Total				
Liabilities:										
Foreign currencies:										
<i>Floating rate</i>										
Australian Dollar loan	AU\$488,118,042	AU\$-	AU\$-	AU\$-	AU\$-	AU\$488,118,042	₱17,888,983,093	₱50,085,857	₱17,838,897,236	
Interest rate: BBSY Bid+1.25%										
New Zealand Dollar loans	NZ\$5,622,167	NZ\$5,606,806	NZ\$400,560,722	NZ\$-	NZ\$-	NZ\$411,789,695	13,625,258,770	126,604,870	13,498,653,900	
Interest rate: NZ BKBM+1.10%										
							₱31,514,241,863	₱176,690,727	₱31,337,551,136	

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on the long-term debts. With all other variables held constant, the Group's income before tax is affected through the impact on floating rate borrowings, as follows:

	Change in basis points	Effect on income before tax
2020	+100	(P315,142,417)
	-100	315,142,417

5. Fair Value Measurement

The following methods and assumptions were used to estimate the fair value of each asset and liability for which it is practicable to estimate such value:

Cash and cash equivalents, receivables (except amounts due from and due to related parties), accounts payable and other accrued liabilities, short-term debts and trust receipts payable
Carrying amounts approximate their fair values due to the relatively short-term maturities of these instruments.

Amounts due from and due to related parties

Carrying amounts of due from and due to related parties, which are payable and due on demand, approximate their fair values.

Financial assets at FVTPL, derivatives and financial assets at FVOCI

Fair values of quoted equity securities are based on quoted prices published in markets.

Biological assets

Biological assets are measured at their fair values less costs to sell. The fair values of Level 2 biological assets are determined based on current market prices of livestock of similar age, breed and genetic merit while Level 3 are determined based on adjusted commercial farmgate prices. Costs to sell include commissions to brokers and dealers, nonrefundable transfer taxes and duties. Costs to sell exclude transport and other costs necessary to get the biological assets to the market.

The Group has determined that the highest and best use of the sucklings and weanlings is finishers while for other biological assets is their current use.

Investment properties

Fair value of investment properties is based on market data (or direct sales comparison) approach. This approach relies on the comparison of recent sale transactions or offerings of similar properties which have occurred and/or offered with close proximity to the subject property.

The fair values of the Group's investment properties have been determined by appraisers in 2017, including independent external appraisers, on the basis of the recent sales of similar properties in the same areas as the investment properties and taking into account the economic conditions prevailing at the time of the valuations are made.

The Group has determined that the highest and best use of the property used for the land and building is its current use.

Long-term debts

The fair value of long-term debts are based on the discounted value of future cash flows (interests and principal) using market rates plus a certain spread.

For the years ended December 31, 2021 and 2020, there were no transfers between Level 1 and Level 2 fair value measurements. Non-financial assets determined under Level 3 include investment properties and biological assets. No transfers between any level of the fair value hierarchy took place in the equivalent comparative period.

Descriptions of significant unobservable inputs to valuation of biological assets, investment properties, and deposits under level 3 of the fair value category follow:

Account	Valuation Technique	Significant Unobservable Inputs
Biological assets	Adjusted commercial farmgate prices	Commercial farmgate prices
Investment properties	Market data approach and cost approach	Price per square meter, size, shape, location, time element, replacement cost and depreciation for improvements
Deposits	Discounted cash flow method	Credit spread

Significant increases (decreases) in reasonable profit margin applied would result in a significantly higher (lower) fair value of the biological assets.

Significant unobservable inputs

Adjusted commercial farmgate prices	Fair value based on commercial farmgate prices, adjusted by considering the age, breed and genetic merit
Size	Size of lot in terms of area. Evaluate if the lot size of property or comparable conforms to the average cut of the lots in the area and estimate the impact of the lot size differences on land value.
Shape	Particular form or configuration of the lot. A highly irregular shape limits the usable area whereas an ideal lot configuration maximizes the usable area of the lot which is associated in designing an improvement which conforms with the highest and best use of the property.
Location	Location of comparative properties whether on a main road, or secondary road. Road width could also be a consideration if data is available. As a rule, properties located along a main road are superior to properties located along a secondary road.
Time element	An adjustment for market conditions is made if general property values have appreciated or depreciated since the transaction dates due to inflation or deflation or a change in investor's perceptions of the market over time. In which case, the current data is superior to historic data.
Replacement cost	Estimated amount of money needed to replace in like kind and in new condition an asset or group of assets, taking into consideration current prices of materials, labor, contractor's overhead, profit and fees, and all other attendant costs associated with its acquisition and installation in place without provision for overtime or bonuses for labor, and premiums for materials.
Depreciation	Depreciation as evidenced by the observed condition in comparison with new units of like kind tempered by consideration given to extent, character, and utility of the property which is to be continued in its present use as part of a going concern but without specific relations to earnings.
Credit spread	Determined by reference to internal data and used to arrive at a discount rate by adding to the risk free rate

6. Business Segment Information

The Group's operating segments are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The Group has four (4) reportable operating segments as follows:

- The branded consumer food products segment manufactures and distributes a diverse mix of salty snacks, chocolates, candies, biscuits, bakery products, beverages, instant noodles and pasta. This segment also includes the packaging division, which manufactures BOPP films primarily used in packaging; and its subsidiary, which manufactures flexible packaging materials for the packaging requirements of various branded food products. Its revenues are in their peak during the opening of classes in June and Christmas season.
- The agro-industrial products segment engages in hog and poultry farming, manufacturing and distribution of animal feeds, glucose and soya products, and production and distribution of animal health products. Its peak season is during summer and before Christmas season.
- The commodity food products segment engages in sugar milling and refining, and flour milling and pasta manufacturing and renewable energy. The peak season for sugar is during its crop season, which normally starts in November and ends in April while flour and pasta's peak season is before and during the Christmas season.
- The corporate business segment engages in bonds and securities investment and fund sourcing activities.

No operating segments have been aggregated to form the above reportable operating business segments.

Management monitors the operating results of business segments separately for the purpose of making decisions about resource allocation and performance assessment. The measure presented to manage segment performance is the segment operating income (loss). Segment operating income (loss) is based on the same accounting policies as consolidated operating income (loss) except that intersegment revenues are eliminated only at the consolidation level. Group financing (including finance costs and revenues), market valuation gain and loss, foreign exchange gains or losses, other revenues and expenses and income taxes are managed on a group basis and are not allocated to operating segments. Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties.

The following tables present the financial information of each of the operating segments in accordance with PFRSs except for Earnings before interest, income taxes and depreciation/amortization (EBITDA) and Earnings before interest and income taxes (EBIT) as of and for the years ended December 31, 2021, 2020, and 2019.

Inter-segment Revenues

Inter-segment revenues are eliminated at the consolidation level.

Segment Results

Segment results pertain to the net income (loss) of each of the operating segments excluding the amounts of market valuation gains and losses on financial assets at FVTPL, foreign exchange gains and losses and other revenues and expenses which are not allocated to operating segments.

Segment Assets

Segment assets are resources owned by each of the operating segments excluding significant inter-segment transactions.

Segment Liabilities

Segment liabilities are obligations incurred by each of the operating segments excluding significant inter-segment transactions. The Group also reports to the chief operating decision maker the breakdown of the short-term and long-term debts of each of the operating segments.

Capital Expenditures

The components of capital expenditures reported to the chief operating decision maker are the additions to investment property and property plant and equipment during the period.

Geographic Information

The Group operates in the Philippines, Vietnam, Thailand, Myanmar, Indonesia, Malaysia, Singapore, China and Hong Kong. As of December 31, 2021, the Group has discontinued its operations in New Zealand and Australia.

The following table shows the distribution of the Group's consolidated revenues to external customers by geographical market, regardless of where the goods were produced:

	December 31, 2021	December 31, 2020	December 31, 2019
		(In Thousands)	
Domestic	₱94,784,394	₱91,931,417	₱92,016,612
Foreign	22,170,394	21,230,368	22,386,606
	₱116,954,788	₱113,161,785	₱114,403,218

The Group has no customer which contributes 10% or more of the consolidated revenues of the Group.

The table below shows the Group's carrying amounts of noncurrent assets per geographic location excluding noncurrent financial assets, deferred tax assets and pension assets:

	December 31, 2021	December 31, 2020

9. Derivative Financial Instruments

Derivative designated as accounting hedge

Currency Option

As part of its asset and liability management, the Group uses derivatives, particularly currency option, as cash flow hedges in order to reduce its exposure to market risks.

The Group entered into currency options with a total notional amount of NZ\$28.2 million and initial fair value of ₱7.5 million. The Group recognized unrealized loss amounting to ₱19.1 million and ₱4.6 million for the years ended December 31, 2020 and 2019 (see Note 33). The Group made a settlement of ₱4.6 million in 2019 for the related derivatives. The Group's currency options have negative fair value of ₱44.3 million as of December 31, 2020 recorded under 'Accounts payable and other accrued liabilities' (see Note 19).

In October 2021, the option was transferred to Intersnack upon divestment (see Note 33).

Derivative not designated as accounting hedge

Call Option

As part of change in ownership of URC Oceania Group, Intersnack was also given an option to acquire an additional 9% equity share in UHC. The call option has a fair value of ₱169.4 million as of December 31, 2020 recorded under ‘Accounts payable and other accrued liabilities’ (see Note 19).

In October 2021, Intersnack exercised the call option to acquire an additional equity share in UHC (see Note 33).

	₹21,271,723,229	₹31,194,495,817

Acquisition of Crunchy Foods Sdn. Bhd.

On December 15, 2021, the Group acquired from Crunchy Limited 100% of the shares of Crunchy Foods Sdn. Bhd. (Crunchy Foods), a non-listed company based in Malaysia. Crunchy Foods fully owns Munchy Food Industries Sdn Bhd (MFI) and its subsidiary Munchworld Marketing Sdn Bhd (MWM) (collectively, the Munchy's Group). They operate under the trade name Munchy's, which is one of the major biscuit brands in Malaysia. The Group acquired Crunchy Foods to gain market leadership in Malaysia in the biscuit segment, which is consistent with the Group's overall purpose. The Munchy's Group is also expected to create synergies with URC Malaysia.

Purchase consideration

The purchase consideration was determined to be RM2.07 billion (₹24.6 billion), which was paid in cash by URC Malaysia to Crunchy Limited in exchange for 683,964,000 ordinary shares (100% of the equity) of Crunchy Foods.

Assets acquired and liabilities assumed

As of December 31, 2021, the purchase price allocation relating to the Group's acquisition of Munchy's Group has been prepared on a preliminary basis, using available information as of acquisition date. The provisional fair values of the net assets acquired as of date of acquisition are based on net book values of identifiable assets and liabilities including certain adjustments since the Group does not yet have complete information about their acquisition-date fair values. The Group is currently finalizing the purchase price allocation, which could result to adjustments to the values of the assets and liabilities listed below (except cash), due to changes in information about facts and circumstances about them that existed as of acquisition date but which are not yet known to the Group. The purchase price allocation will include independent valuation of these assets and liabilities, as well as the identification of other assets or liabilities that have not yet been known to Group but which already existed as of acquisition date. The difference between the total consideration and net assets amounting to ₹19.9 billion was initially allocated to goodwill. The preliminary allocation is subject to revision to reflect the final determination of fair values. The preliminary accounting will be completed based on further valuations and studies carried out within 12 months from acquisition date.

The provisional fair values of the identifiable assets and liabilities of Munchy's at the date of acquisition follow:

Purchase consideration transferred	₱24,586,990,326
Fair value of identifiable assets	
Cash and cash equivalents	1,733,890,589
Receivables	762,764,213
Inventories	519,197,774
Property, plant and equipment (Note 13)	1,863,711,802
Right-of-use assets	1,635,322
Brands	1,306,573,017
Intangible assets	1,455,163
Other current assets	94,893,542
Total assets	6,284,121,422
Fair value of identifiable liabilities	
Accounts payable and other accrued liabilities	1,206,202,247
Deferred tax liabilities	400,250,806
Lease liability	1,658,574
Total liabilities	1,608,111,627
Total fair value of identifiable net assets	4,676,009,795
Goodwill	₱19,910,980,531

The goodwill of ₱19.9 billion comprise the value of expected synergies arising from the acquisition. Goodwill and these intangible assets are allocated entirely to the operations of the Munchy's brands. None of the goodwill is expected to be deductible for income tax purposes.

If the business combination had taken place at the beginning of the year, net sales and net income from the continuing operations of the Group would have been ₱121.9 billion and ₱13.3 billion, respectively.

Trademarks and product formulation were acquired from General Milling Corporation in 2008.

Total intangible assets acquired from the acquisition of CSPL and URC NZ HoldCo in 2016 and 2014 were composed of brands of ₱9.3 billion, customer relationships of ₱2.2 billion and software costs of ₱56.3 million.

The Group performed its annual impairment test on its goodwill and other intangible assets with indefinite useful lives as of December 31, 2021 and 2020. In 2021 and 2020, the recoverable amounts of goodwill and other intangible assets were determined based on value in use calculations.

Value in use calculations used cash flow projections from financial budgets approved by management covering a five-year period. The pre-tax discount rates applied to cash flow projections range from 8.57% to 12.58% and 9.03% to 14.52% for the years ended December 31, 2021 and 2020, respectively. The following assumptions were also used in computing value in use:

Growth rate estimates - growth rates include revenue growth and terminal growth rates that are based on experiences and strategies developed for the various subsidiaries. The prospect for the industry was also considered in estimating the growth rates. Growth rates used in computing the projected future cash flows ranged from 3.90% to 6.10% and 2.00% to 6.60% as of December 31, 2021 and 2020, respectively.

Discount rates - discount rates were estimated based on the industry weighted average cost of capital, which includes the cost of equity and debt after considering the gearing ratio.

Management believes that no reasonably possible changes in any of the above key assumptions would cause the carrying values of goodwill and intangible assets arising from the Group's acquisitions to materially exceed their recoverable amounts.

Others	51,294,262	70,979,466
	₱22,578,884,570	₱24,831,836,720

Trade payables are noninterest-bearing and are normally settled on 30-60 day terms. Trade payables arise from purchases of inventories which include raw materials and indirect materials (i.e., packaging materials) and supplies, for use in manufacturing and other operations.

The accrued expenses account consists of:

	2021	2020
Advertising and promotions	₱2,578,945,327	₱4,168,067,417
Rent	457,106,582	348,924,743
Contracted services	357,192,934	295,941,690
Personnel costs	327,561,717	1,145,936,799

Interest	16,543,095	89,132,405
Others	1,324,560,106	1,012,882,387
	₱5,787,267,776	₱8,021,725,105

Customers' deposits represent downpayments for the sale of goods or performance of services which will be applied against accounts receivables upon delivery of goods or rendering of services.

Accrued professional and legal fees include fees or services rendered by third party consultants for the review of the Group's brand portfolio and supply chain optimization initiatives. The related expense recognized under 'Other income (losses) – net' in the 2021, 2020 and 2019 consolidated statements of income amounted to ₱176.7 million, nil and ₱161.3 million, respectively.

Others include accruals for taxes and licenses, commission, royalties, restructuring provision and other benefits. In 2019, the Group recorded a restructuring provision related to downsizing of farm operations and consolidation of plant operations. The key objectives of the restructuring are: (a) to focus on the profitable and growing animal nutrition and health business, (b) to maximize the value-added chain concentrating on the processed meat business and (c) to improve long-term cost efficiencies for both farm and plant operations. The restructuring provision consists of write-down of biological assets (Note 14), property, plant and equipment (Note 13) and accrual of employee redundancy costs amounting ₱239.0 million, ₱453.7 million and ₱137.1 million, respectively. The related expense is recognized under “Other income (losses) - net” in the consolidated statement of income. As of December 31, 2021, ₱39.5 million remains of the accrual for employee redundancy costs.

20. Long-term Debts

This account consists of:

	2020		
	Principal	Unamortized debt issuance cost	Net
URC AU FinCo Loan	₱17,888,983,093	₱50,085,857	₱17,838,897,236
URC NZ FinCo Loan	13,625,258,770	126,604,870	13,498,653,900
	₱31,514,241,863	₱176,690,727	₱31,337,551,136

URC AU FinCo Loan due 2022

On September 30, 2016, URC AU FinCo entered into a syndicated term loan facility agreement guaranteed by the Parent Company payable in five years, amounting to AU\$484.2 million (₱17.9 billion), with various banks for payment of acquisition costs and to refinance certain indebtedness of an acquired company, CSPL. This syndicated term loan was refinanced through a bridge loan facility agreement payable in six months amounting to AU\$484.2 million with three banks. The loan obtained bears a market interest rate plus a certain spread, payable monthly, maturing on March 29, 2022.

URC NZ FinCo NZ\$395 Million Term Loan due 2023

On October 22, 2018, URC NZ FinCo entered into a term loan facility agreement guaranteed by the Parent Company payable in five years, amounting to NZ\$395.0 million (₱14.4 billion), with various banks for payment of the NZ\$420 million term loan due in 2019. The loan obtained bears a market interest rate plus a certain spread, payable quarterly, and maturing on October 22, 2023.

These long-term loans have no collateral but are all guaranteed by the Parent Company.

For each of these loans, the Group is required to maintain consolidated debt to equity ratio of not greater than 2.5 to 1.0. The Group has complied with all of its debt covenants as of December 31, 2020.

Interest expense on these long-term debts amounted to ₱427.7 million, ₱505.5 million and ₱866.4 million in 2021, 2020 and 2019, respectively.

In October 2021, the long-term debt was transferred to Intersnack Group upon divestment (see Note 33).

21. Other Noncurrent Liabilities

This account consists of:

	2021	2020
Net pension liability (Note 31)	₱383,206,789	₱1,022,260,701
Miscellaneous	–	224,440,047
	₱383,206,789	₱1,246,700,748

Miscellaneous includes asset retirement obligation and other noncurrent liabilities.

Asset retirement obligation arises from obligations to restore the leased manufacturing sites, warehouses and offices of CSPL at the end of the respective lease terms. These provisions are calculated as the present value of the estimated expenditures required to remove any leasehold improvements. These costs are currently capitalized as part of the cost of the plant and equipment and are amortized over the shorter of the lease term and the useful life of assets.

As of December 31, 2021 and 2020, the carrying value of asset retirement obligation amounted to nil and ₱183.8 million, respectively. The amortization of this asset retirement obligation (included in 'Finance costs' under discontinued operations) amounted to ₱2.5 million, ₱3.0 million and ₱3.3 million for the years ended December 31, 2021, 2020, and 2019, respectively (see Note 33).

22. Equity

The details of the Parent Company's common stock as of December 31 follow:

	2021	2020
Authorized shares	2,998,000,000	2,998,000,000
Par value per share	₱1.00	₱1.00
Issued shares:		
Balance at beginning and end of year	2,230,160,190	2,230,160,190
Outstanding shares	2,200,983,378	2,204,161,868

The paid-up capital of the Parent Company consists of the following as of December 31, 2021 and 2020:

Common stock	₱2,230,160,190
Additional paid-in capital	21,191,974,542
Total paid-up capital	₱23,422,134,732

Capital Management

The primary objective of the Group's capital management is to ensure that it maintains healthy capital ratios in order to support its business and maximize shareholder value. The Group manages its capital structure and makes adjustments to these ratios in light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividend payment to shareholders, return capital structure or issue capital securities. No changes have been made in the objective, policies and processes as they have been applied in previous years.

The Group monitors its use of capital structure using a financial debt-to-equity ratio which is total financial debt divided by total equity. The Group includes within gross debt all interest-bearing loans and borrowings, while capital represents total equity.

Following is a computation of the Group's financial debt-to-equity ratio:

	December 31, 2021	December 31, 2020
(a) Short-term debts (Note 18)	₱7,808,029,451	₱2,668,790,196
Trust receipts payable (Note 11)	8,106,662,079	7,454,089,371
Long-term debts (Note 20)	-	31,337,551,136
	₱15,914,691,530	₱41,460,430,703
(b) Equity	₱109,767,733,832	₱97,784,161,934
(c) Financial debt-to-equity ratio (a/b)	0.14:1	0.42:1

The Group's policy is to not exceed a financial debt-to-equity ratio of 2:1. The Group considers its total equity as capital.

Cumulative Redeemable Preferred Shares

The Group's authorized preferred shares of stock are 12.00% cumulative, nonparticipating, and nonvoting. In case of dissolution and liquidation of the Parent Company, the holders of the preferred shares shall be entitled to be paid an amount equal to the par value of the shares or ratably insofar as the assets of the Parent Company may warrant, plus accrued and unpaid dividends thereon, if any, before the holders of the common shares of stock can be paid their liquidating dividends. The authorized preferred stock is 2,000,000 shares at par value of ₱1.00 per share. There have been no issuances of preferred stock as of December 31, 2021 and 2020.

Retained Earnings

Accumulated equity in net earnings of the subsidiaries

A portion of the Group's retained earnings corresponding to the undistributed net earnings of the subsidiaries and joint ventures amounting to ₱78.2 billion and ₱66.1 billion as of December 31, 2021 and 2020, respectively, is not available for dividend declaration. This becomes available for dividend declaration upon dividend distribution by the investees.

Dividends

Details of the Group's dividend declarations follow:

Parent Company

On July 30, 2021, the Parent Company's BOD declared special cash dividends amounting to ₱1.80 per share to stockholders of record as of August 19, 2021. On September 15, 2021, the special cash dividend was paid amounting to ₱4.0 billion.

On April 29, 2021, the Parent Company's BOD declared regular cash dividends amounting to ₱1.50 per share to stockholders of record as of May 20, 2021. On June 15, 2021, the regular cash dividend was paid amounting to ₱3.3 billion.

On March 10, 2020, the Parent Company's BOD declared regular cash dividends amounting to ₱1.50 per share to stockholders of record as of March 24, 2020. On the same date, the Parent Company's BOD declared special cash dividends amounting to ₱1.65 per share to stockholders of record as of June 1, 2020. Total dividends declared amounted to ₱6.9 billion. On April 21, 2020, the regular cash dividend was paid amounting to ₱3.3 billion. On June 26, 2020, the special cash dividend was paid amounting to ₱3.6 billion.

On February 28, 2019, the Parent Company's BOD declared regular cash dividends amounting to ₱1.50 per share to stockholders of record as of March 14, 2019. On the same date, the Parent Company's BOD declared special cash dividends amounting to ₱1.65 per share to stockholders of record as of July 1, 2019. Total dividends declared amounted to ₱6.9 billion. On March 28, 2019, the regular cash dividend was paid amounting to ₱3.3 billion. On July 25, 2019, the special cash dividend was paid amounting to ₱3.6 billion.

NURC

On June 10, 2021, NURC's BOD approved the declaration of cash dividends amounting to ₱885.0 million (₱4.68 per share) to stockholders of record as of June 10, 2021 payable on or before December 31, 2021.

On June 9, 2020, NURC's BOD approved the declaration of cash dividends amounting to ₱700.0 million (₱3.70 per share) to stockholders of record as of December 31, 2019 payable on or before September 30, 2020.

On June 6, 2019, NURC's BOD approved the declaration of cash dividends amounting to ₱600.0 million (₱3.17 per share) to stockholders of record as of December 31, 2018 payable on or before September 30, 2019.

The Group intends to maintain an annual cash dividend payment ratio of 50.0% of the Group's consolidated net income from the preceding fiscal year, subject to the requirements of the applicable laws and regulations and the absence of circumstances which may restrict the payment of such dividends. The BOD may, at any time, modify such dividend payment ratio.

Appropriation of retained earnings

On December 16, 2020, the BOD approved the reversal of the appropriation of retained earnings in the aggregate amount of ₱2.0 billion, which was approved by the BOD in its resolutions adopted on September 8, 2015 and September 7, 2016.

Treasury Shares

The Parent Company has outstanding treasury shares of 29.2 million shares (₱1.1 billion) and 26.0 million shares (₱679.5 million) as of December 31, 2021 and 2020, respectively, restricting the Parent Company from declaring an equivalent amount from unappropriated retained earnings as dividends.

Equity Reserve

In December 2019, Intersnack bought 40% of the Group's equity interest in the Oceania businesses for a total consideration of ₱7.7 billion. As a result of the sale, the equity interest of URC changed from 100.0% to 60.0%. The excess of the total consideration received over the carrying amount of the equity transferred to NCI amounting to ₱2.4 billion was presented under 'Equity reserve' in the consolidated statements of financial position.

In October 2021, the Group sold its remaining 60.0% equity interest in Oceania businesses to Intersnack (see Note 33). As a result, the Group derecognized the assets and liabilities related to its Oceania businesses. The Group is of the view that the Equity Reserve can be reclassified to Retained Earnings to present more useful information about its equity. The Group evaluated the nature of the Equity Reserve, and if there are specific requirements on its derecognition. Management also considered nature of equity and the applicability of the requirements of PFRSs and definitions, recognition criteria and measurement concepts in the Framework.

On February 8, 2022, the Group requested for the Philippine SEC's opinion on the reclassification and subsequent treatment of the Equity Reserve. On February 22, 2022, the SEC confirmed that the reclassification of the Equity Reserve to Retained Earnings, does not counter any principles in PFRSs, and would allow for more understandable financial information for users. Accordingly, the Group reclassified Equity Reserve amounting to ₱2.4 billion to Retained Earnings.

In December 2014, URC entered into a share purchase agreement with Nissin Foods (Asia) Pte. Ltd. to sell 14.0% of its equity interest in NURC for a total consideration of ₱506.7 million. As a result of the sale, the equity interest of URC changed from 65.0% to 51.0%. The excess of the consideration received over the carrying amount of the equity transferred to NCI amounting to ₱481.1 million is presented under 'Equity reserve' in the consolidated statements of financial position.

In August 2012, the Parent Company acquired 23.0 million common shares of URCICL from International Horizons Investment Ltd for ₱7.2 billion. The acquisition of shares represented the remaining 23.00% interest in URCICL. As a result of the acquisition, the Parent Company now holds 100.00% interest in URCICL. The Group charged equity reserve from the acquisition amounting to about ₱3.7 billion presented under 'Equity reserve' in the consolidated statements of financial position.

Others include unamortized debt issue costs recognized as expense on pretermination of NZD loan, amortization of asset retirement obligation and other financing charges.

31. Pension Costs

The Group has a funded, noncontributory defined benefit retirement plan covering all its employees. The pension funds are being administered and managed through JG Summit Multi-Employer Retirement Plan, with Robinsons Bank Corporation (RBC) as Trustee. The plan provides for retirement, separation, disability and death benefits to its members. The Group, however, reserves the right to discontinue, suspend or change the rates and amounts of its contributions at any time on account of business necessity or adverse economic conditions. The retirement plan has an Executive Retirement Committee that is mandated to approve the plan, trust agreement, investment plan, including any amendments or modifications thereto, and other activities of the Plan. Certain members of the BOD of the Ultimate Parent Company are represented in the Executive Retirement Committee. RBC manages the funds based on the mandate as defined in the trust agreement.

Under the existing regulatory framework, Republic Act (RA) 7641, *the Philippine Retirement Pay Law*, requires a provision for retirement pay to qualified private sector employees in the absence of any retirement plan in the entity, provided however that the employee's retirement benefits under any collective bargaining and other agreements shall not be less than those provided under law. The law does not require minimum funding of the plan. The Parent Company and all of its subsidiaries meet the minimum retirement benefit under RA 7641.

As of December 31, 2021 and 2020, the Group recognized net pension liability amounting to ₱383.2 million and ₱1.0 billion, respectively, included under 'Other noncurrent liabilities' in the consolidated statements of financial position amounted to (see Note 21).

The costs of defined benefit pension plan as well as the present value of the pension obligation are determined using actuarial valuations. The actuarial valuation involves making various assumptions. The principal assumptions used in determining pension for defined benefit plans are as follows:

	Parent Company		NURC	
	2021	2020	2021	2020
Discount rate	5.09%	3.95%	5.08%	3.97%
Salary increase	4.00%	4.00% to 5.70%	4.00%	5.70%

The overall expected rate of return on assets is determined based on the market expectation prevailing on that date, applicable to the period over which the obligation is to be settled.

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the defined benefit obligation as of the reporting period, assuming all other assumptions were held constant:

	Increase (Decrease)	Parent Company		NURC	
		2021	2020	2021	2020
Discount rate	1.00%	(₱230,507,684)	(₱313,674,690)	(₱5,925,328)	(₱7,456,849)
	(1.00%)	269,614,527	374,153,976	6,930,471	8,930,181
Salary increase	1.00%	269,864,839	363,884,506	6,936,203	8,680,414
	(1.00%)	(234,831,852)	(311,805,652)	(6,036,004)	(7,409,251)

The Group expects to contribute ₱337.7 million in the pension fund in 2022.

Shown below is the maturity analysis of the Group's expected (undiscounted) benefit payments:

	2021	2020
Less than one year	₱210,902,007	₱149,778,409
More than one year to five years	1,097,560,577	824,835,258
More than five years to 10 years	1,513,546,156	1,518,479,037
More than 10 years to 15 years	1,895,016,653	2,177,478,768
More than 15 years to 20 years	2,114,945,942	2,511,576,982
More than 20 years	6,024,292,339	8,732,285,054

Shown below is the average duration of the defined benefit obligation at the end of the reporting period:

	2021	2020
	(Years)	
Parent Company	9	11
NURC	9	12

32. Income Taxes

Provision for income tax consists of:

Others	1.21	1.91	1.90
Effective income tax rate	7.26%	15.50%	14.98%

Under Philippine tax laws, the Group is subject to income taxes, as well as other taxes (presented as ‘Taxes and licenses’ in the consolidated statements of income). Other taxes paid consist principally of documentary stamp taxes, real estate taxes and municipal taxes.

Corporate Recovery and Tax Incentives for Enterprises or “CREATE” Act

The Corporate Recovery and Tax Incentives for Enterprises (CREATE) Act was signed into law on March 26, 2021. This aimed to attract more investments and maintain fiscal prudence and stability in the Philippines. Republic Act (RA) 11534 of the CREATE Act introduced reforms to the corporate income tax and incentives systems. It took effect 15 days after its complete publication in the Official Gazette on April 11, 2021.

The following are the key changes to the Philippine tax law pursuant to the CREATE Act which have an impact to the Company:

- Effective July 1, 2020, Regular Corporate Income Tax (RCIT) rate is reduced from 30% to 25% for domestic and resident foreign corporations. For domestic corporations with net taxable income not exceeding ₱5.0 million and with total assets not exceeding 100.0 million (excluding land on which the business entity’s office, plant and equipment are situated) during the taxable year, the RCIT rate is reduced to 20%. Furthermore, effective July 1, 2020, interest expense allowed as a deductible expense is reduced by 20% from 33% of interest income subject to final tax.
- Minimum corporate income tax (MCIT) rate reduced from 2% to 1% of gross income effective July 1, 2020 to June 30, 2023.
- Imposition of improperly accumulated earnings tax (IAET) is repealed.
- Applying the provisions of the CREATE Act, the Company is subject to lower RCIT rate of 25% effective July 1, 2020.
- Based on the provisions of Revenue Regulations (RR) No. 5-2021 dated April 8, 2021 issued by the BIT, the prorated corporate income tax rate of the Company for the year 2020 is 27.5%. Consequently, during the year, the Company reversed a portion of its 2020 income tax payable and provision for current income tax accounts amounting to ₱74.2 million. Also, it derecognized its deferred tax assets amounting to ₱89.0 million, provision for deferred income tax for ₱43.5 million, and other comprehensive income for ₱45.5 million.

Current tax regulations further provides that an Optional Standard Deduction (OSD) equivalent to 40.0% of gross income may be claimed as an alternative deduction in computing for the RCIT. For the years ended December 31, 2021, 2020, and 2019, the Group did not claim the OSD in lieu of the itemized deductions.

Entertainment, Amusement and Recreation (EAR) Expenses

Current tax regulations define expenses to be classified as EAR expenses and set a limit for the amount that is deductible for tax purposes. EAR expenses are limited to 0.5% of net sales for sellers of goods or properties or 1.0% of net revenue for sellers of services. For sellers of both goods or properties and services, an apportionment formula is used in determining the ceiling on such expenses. The Group recognized EAR expenses (included under 'General and administrative expenses' in the consolidated statements of income) amounting to ₱44.5 million, ₱40.9 million, and ₱76.2 million for the years ended December 31, 2021, 2020, and 2019, respectively.

MCIT

An MCIT on modified gross income is computed and compared with the RCIT. Any excess of the MCIT over RCIT is deferred and can be used as a tax credit against future income tax liability for the next three years.

33. Discontinued Operations and Disposal of Businesses

Sale of Oceania businesses

In July 2019, Intersnack, agreed to buy 40% of Oceania businesses of URC, to leverage on the Group's and Intersnack's know-how from their respective markets. This transaction is expected to yield better manufacturing, supply chain and sustainability practices and will set the groundwork for an even larger and more efficient Oceania operations. On December 23, 2019, the Australian Foreign Investment Review Board (FIRB) approved the transaction. Following the approval, the transaction was completed on the same date. Considerations received for the transaction consisted of cash and Yarra Valley net assets amounting to US\$142.0 million (₱7.2 billion) and US\$10.1 million (₱0.5 billion), respectively. As part of the agreement, Intersnack was also given an option to acquire an additional 9% equity share in UHC.

As a result of the sale, the equity interest of URC changed from 100.0% to 60.0%, and gave rise to 40% non-controlling interest in the consolidated financial statements. As the Group continued to exercise control over UHC, the partial disposal was accounted for as a transaction between owners in their capacity as owners, or an equity transaction, in accordance with the requirements of PFRS 3, *Business Combinations*. Accordingly, the excess of the total consideration received over the carrying amount of the equity transferred and call option issued to NCI amounting to ₱2.4 billion is presented under 'Equity reserve' in the consolidated statement of financial position.

On July 29, 2021, URC Oceania executed a share purchase agreement to sell its remaining 60% ownership interest in its Australia and New Zealand businesses (held under UHC) to Intersnack Group. The first tranche was the exercise of the call option from the 2019 transaction by Intersnack, which allowed it to acquire an additional 9% ownership interest (38,700 ordinary shares) in UHC at a pre-determined exercise price. This was immediately followed by the sale for cash of the remaining 51% ownership interest (219,300 ordinary shares) in UHC. The total cash received by URC Oceania from the 2021 disposal amounted to ₱24.0 billion.

The closing conditions were met, and the transaction was approved by the Australian Foreign Investment Review Board and New Zealand Overseas Investment Office on October 29, 2021. As a result of this transaction, the Group has relinquished control and ownership over UHC and its subsidiaries.

The derecognized assets and liabilities of UHC as of the date of deconsolidation follow:

There are no agreements between the Group and any of its directors and key officers providing for benefits upon termination of employment, except for such benefits to which they may be entitled under the Group's pension plans.

Approval Requirements and Limits on the Amount and Extent of Related Party Transactions

Material related party transactions (MRPT) refers to any related party transaction/s, either individually, or in aggregate over a twelve (12)-month period with the same related party, amounting to ten percent (10%) or higher of the Group's total consolidated assets based on its latest audited financial statements.

All individual MRPT's shall be approved by at least two-thirds (2/3) vote of the BOD, with at least a majority of the Independent Directors voting to approve the MRPT. In case that a majority of the Independent Directors' vote is not secured, the MRPT may be ratified by the vote of the stockholders representing at least two-thirds (2/3) of the outstanding capital stock.

Aggregate RPT transactions within a 12-month period that meets or breaches the materiality threshold shall require the same BOD approval mentioned above.

36. Registration with the BOI

Certain operations of the Parent Company are registered with the BOI as preferred pioneer and nonpioneer activities. As a registered enterprise, the Parent Company is subject to some requirements and is entitled to certain tax and non-tax incentives which are considered in the computation of the provision for income tax.

Sugar Millsite - Sonedco

On June 29, 2018, Sugar Millsite - Sonedco was registered with the BOI as an expanding producer of refined sugar and its by-product (molasses).

Under the terms of the registration and subject to certain requirements, Parent Company is entitled to the following fiscal and non-fiscal incentives: (a) ITH for a period of three (3) years from September 2018 (as an expanding producer of refined sugar and its by-product) or actual start of commercial operation, whichever is earlier, but availment shall in no case be earlier than the date of registration; (b) importation of capital equipment, spare parts and accessories at zero (0) duty under EO No. 22 and its Implementing Rules and Regulations. Only capital equipment, spare parts and accessories directly needed and exclusively used in its operation shall be entitled to zero duty; (c) exemption from taxes and duties on imported spare parts and consumable supplies for export producers with Customs Bonded Manufacturing Warehouse (CBMW) exporting at least seventy percent (70%) of production; (d) additional deduction for labor expense for a period of five (5) years from registration an amount equivalent to fifty percent (50%) of the wages corresponding to the increment in number of direct labor for skilled and unskilled workers in the year of availment as against the previous year, if the project meets the prescribed ratio of capital equipment to the number of workers set by the Board. This may be availed of for the first five (5) years from the date of registration but not simultaneously with ITH; (e) importation of consigned equipment for a period of ten (10) years from date of registration, subject to posting of re-export bond; (f) employment of foreign nationals. This may be allowed in supervisory, technical or advisory positions for five (5) years from date of registration; (g) simplification of Customs procedures for the importation of equipment, spare parts, raw materials and supplies; (h) exemption from wharfage dues, and export tax, duty, impost and fee for a period of ten (10) years from the date of registration; (i) access to CBMW subject to the Customs rules and regulations, and (j) additional deduction from taxable income equivalent to 100% of expenses incurred in the development of necessary and major infrastructure facilities.

The said expansion started commercial operation on November 27, 2018.

37. Commitments and Contingencies

Milling Contracts

Milling contracts with various planters provide for a 60%-70% share to the planters (including related parties) and 30%-40% share to the Group of sugar and molasses produced from sugar canes milled. The Sugar Industry Development Act of 2015 provides that, to ensure the immediate payment of farmers and secure their income from sugarcane, farmers may enter into any payment method with the sugar mill.

Sugar under Custody but Not Owned

As of December 31, 2021 and 2020, the Group has in its custody sugar owned by several quedan holders amounting to ₱1.4 billion (862,837 Lkg) and ₱1.6 billion (963,224 Lkg), respectively. The said volume of sugar is not reflected in the consolidated statements of financial position since this is not owned by the Group. The Group is accountable to both quedan holders and sugar traders for the value of these trusted sugar or their sales proceeds.

Leases

The Group's leases mostly pertain to land, office spaces, warehouses, machinery and equipment, transportation equipment and furniture and fixtures. Leases of land, office spaces, warehouses, machinery and equipment, transportation equipment and furniture and fixtures generally have terms ranging from two (2) to thirty (30) years.

The Stockholders and the Board of Directors
Universal Robina Corporation
8th Floor, Tera Tower, Bridgetowne
E. Rodriguez, Jr. Avenue (C5 Road)
Ugong Norte, Quezon City, Metro Manila

We have audited, in accordance with Philippine Standards on Auditing, the consolidated financial statements of Universal Robina Corporation and Subsidiaries (the Group) as at December 31, 2021 and 2020, for each of the three years in the period ended December 31, 2021, included in this Form 17-A and have issued our report thereon dated March 4, 2022. Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The schedules listed in the Index to Consolidated Financial Statements and Supplementary Schedules are the responsibility of the Group's management. These schedules are presented for purposes of complying with the Revised Securities Regulation Code Rule 68 and are not part of the basic consolidated financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic consolidated financial statements and, in our opinion, fairly state, in all material respects, the information required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.
